Is the scope of Microsoft Dynamics AX defined? How does Microsoft Dynamics AX integrate with other business initiatives? Can Management personnel recognize the monetary benefit of Microsoft Dynamics AX? How do we Improve Microsoft Dynamics AX service perception, and satisfaction? What vendors make products that address the Microsoft Dynamics AX needs? Defining, designing, creating, and implementing a process to solve a business challenge or meet a business objective is the most valuable role... In EVERY company, organization and department. Unless you are talking a one-time, single-use project within a business, there should be a process. Whether that process is managed and implemented by humans, AI, or a combination of the two, it needs to be designed by someone with a complex enough perspective to ask the right questions. Someone capable of asking the right questions and step back and say, 'What are we really trying to accomplish here? And is there a different way to look at it?' For more than twenty years, The Art of Service's Self-Assessments empower people who can do just that - whether their title is marketer, entrepreneur, manager, salesperson, consultant, business process manager, executive assistant, IT Manager, CxO etc... - they are the people who rule the future. They are people who watch the process as it happens, and ask the right questions to make the process work better. This book is for managers, advisors, consultants, specialists, professionals and anyone interested in Microsoft Dynamics AX assessment. Featuring 599 new and updated case-based questions, organized into seven core areas of process design, this Self-Assessment will help you identify areas in which Microsoft Dynamics AX improvements can be made. In using the questions you will be better able to: - diagnose Microsoft Dynamics AX projects, initiatives, organizations, businesses and processes using accepted diagnostic standards and practices - implement evidence-based best practice strategies aligned with overall goals - integrate recent advances in Microsoft Dynamics AX and process design strategies into practice according to best practice guidelines Using a Self-Assessment tool known as the Microsoft Dynamics AX Scorecard, you will develop a clear picture of which Microsoft Dynamics AX areas need attention. Included with your purchase of the book is the Microsoft Dynamics AX Self-Assessment downloadable resource, containing all 599 questions and Self-Assessment areas of this book. This enables ease of (re-)use and enables you to import the questions in your preferred Management or Survey Tool. Access instructions can be found in the book. You are free to use the Self-Assessment contents in your presentations and materials for customers without asking us - we are here to help. This Self-Assessment has been approved by The Art of Service as part of a lifelong learning and Self-Assessment program and as a component of maintenance of certification. Optional other Self-Assessments are available. For more

Dynamics is a great product, because anyone is able to master the basics with just a little bit of a test drive. As you use it more, you will probably stumble on feature that no-one mentioned that makes Dynamics AX even better, and you store it away in your back pocket to use later on. The more you use the system, the more of these you will find, and with enough of these you turn from just a User to a Power User. To give you a head start though we have compiled 50 of the most useful tricks and tips that you can take advantage of within Dynamics AX. They range from tips on tweaking the Dynamics AX client to some of the hidden features within Dynamics AX itself that you may not know you can do. They also include tips on how to use other tools that are available to you to report better from the system, and how to use the office suite to really power charge Dynamics AX. You may not use all of these tricks and tips, but we are sure that you will be able to use a lot of them.

The Human Resource Management area within Dynamics AX not only allows you to manage all of your employees employment information, but it also allows you to track jobs & positions within the organization, track recruiting projects, and much more. A lot of the core information that you can configure within the Human Resource Management area is also leveraged by other areas of Dynamics AX for approvals, skill matching, and also resource management so even if you are not going to be using all of the Human Resource Management features right away, you will definitely be using some of them. Setting up the Human Resource Management area is not hard to do either, and this guide is designed to give you step by step instructions on how to configure all of the base codes and controls that you need to make the Human Resource Management area tick correctly and also to give you step by step instructions on how you can quickly load all of the necessary worker, position and job information so that you can speed up the data load process and get you up and running quickly. Having users perform their own reporting has been a dream on both sides of the organization. The IT group don't particularly like creating reports for the users when they could be spending their time on cooler projects, and users don't particularly like waiting for IT to create the reports that they need to track the data because it's never quite what they wanted, and also takes so long to get (because of the first reason) that it's usually out-of-date. If only there was a solution... Well there is, because there are so many tools built into Dynamics AX and also the productivity tools like Excel and Word that the users can easily create their own reports themselves without having to get the IT group involved. Everybody wins! In this guide we will show you how the users can do just that, it's so easy that they may not even realize that they are creating reports.

Disclaimer: I didn't write all of the content, I just made it usable, so if you want to do all of the legwork yourself, then all of this information is publicly available. And also there were about 5 courses that didn't have the best content, so I did the best with what I could. The guide has about 500+ pages all told so there is a lot of information for you all to help you with your studies.

This comprehensive guide to the Project Management and Accounting module in Microsoft Dynamics AX provides the overview you need to harness the software's power to grow your business. This Dynamics AX module is ideal for tracking time and costs within an organization, providing invaluable information for financial and project management. It is crucial that you thoroughly plan your setup to take advantage of the module's integration with other software features, such as Payables, Receivables, Inventory, General Ledger, and more. Part 1 of this two-part guide reviews major topics in accounting and controlling as they relate to module setup and configuration. A second volume, part 2, demonstrates how to tap into the module's extensive functionality in specific scenarios. Together, both parts form an exhaustive manual. Demo machines are available for download and ready to run without specific add-ons or code modifications, though basic knowledge of Microsoft Dynamics AX terminology is vital. These demos allow you to follow along with all examples given. With its focus on issues of accounting and control, this informative manual helps you optimize your use of Dynamics AX to ensure your project's success.
