Life can be surprising. From this point on my life's journey, I look back, and it almost seems surreal. As I gaze through that long traveled pathway of time, I can honestly say that had I had a chance at the beginning to glimpse forward to see where this traveled road would take me, I wouldn't have believed it. And so, this is probably true for a lot of us in my generation. We were born into a time of change, significant change. The kind of change that would set our lives and those of the following generations apart from those of just one generation ahead of us. The previous generations secured our future. They paid for it with their personal sacrifice and unrivaled bravery. That future has also served to make the world a smaller place, whether it be by audio and video communications, computers, or the commonplace of jet travel. As part of this "new" world, I have gone on to see and do things that seemed to be out of reach from that generational point where I entered this life. As I have reached the more "senior" years of my life, I have found the temptation to document a lot of life's little adventures, or "misadventures" as they may be. I am also responding to those many people who have said "you should write a book". The technology of

today has also made this temptation easy and practical to implement. This book is my first pass at this endeavor, at least in the non-technical realm. The subject matter was an easy choice. The events covered in this book affected many things in many ways. These effects include both future generations and the geographical aspects of the regions involved. More importantly, this story, at least in part, shares common elements with many other people and communities. In some cases, these same things are occurring right now, in probably very similar circumstances. This book just may provide helpful insight to others who now stand where we once stood. Bob Strauss

Een bijzondere kans, want deze woestijnplaneet is de enige plek waar de ontzettend waardevolle specie melange kan worden gedolven. Op zijn thuisplaneet Caladan bereidt Leto zijn vertrek voor. Hij, zijn concubine Jessica en hun zoon Paul vermoeden dat de benoeming een valstrik is van hun aartsrivalen, de Harkonnens. A comprehensive disctionary of common misusages illustrates the right way and the wrong way to use language and explores why dictionaries do not always provide the correct meaning or usage of a word.

Ieder mens ontdekt een keer dat het leven eindig is.

Sommigen beseffen het als kind al, anderen pas wanneer de eerste grijze haren zich aandienen. Vaak proberen we dat besef zo snel mogelijk weer te verdringen, of we gaan ons verzetten, met zalfjes, pilletjes of preventief medisch onderzoek. En dat is een misverstand, betoogt Barbara Ehrenreich in dit heerlijk nuchtere, geestige en tegelijkertijd diepgravende en vlijmscherpe boek. De mens heeft namelijk nauwelijks invloed op het verouderingsproces, in elk geval veel minder dan de gezondheidsindustrie ons wil doen geloven. Het enige wat we kunnen kopen is de illusie dat we de boel onder controle hebben. En daar koop je uiteindelijk natuurlijk niet veel voor. Wat ons te doen staat is zowel eenvoudig als lastig: we moeten onze sterfelijkheid accepteren en onzekerheid aanvaarden. Met Oud genoeg dood te gaan schreef Ehrenreich het beste pleidooi voor een goed leven.

This book presents a unique annotated collection of some 2000 playground games, rhymes, and wordplay of London children. It charts continuity and development in childlore at a time of major social and cultural change and offers a detailed snapshot of changes in the traditions and language of young

people. Topics include: starting a game; counting-out rhymes; games (without songs); singing and chanting games; clapping, skipping, and ball bouncing games; school rhymes and parodies; teasing and taunting; traditional belief and practice; traditional wordplay; and a concluding miscellany. Recorded mainly in the 1980s by primary schoolteacher Nigel Kelsey, transcribed verbatim from the children's own words, and accompanied by extensive commentaries and annotation, the book sets a wealth of new information in the wider historical and contemporary context of existing studies in Britain, Ireland, and other parts of the English-speaking world. This valuable new resource will open new avenues for research and be of particular interest to folklorists and linguists, as well as to those working across the full spectrum of social, cultural, and educational studies.

Can it really be true that 'golf' stands for 'Gentlemen Only Ladies Forbidden'? Or that 'rule of thumb' comes from an archaic legal principle that a man may chastise his wife, but only with a rod no thicker than his thumb? These and hundreds of other stories are commonly told and retold whenever people meet. They grow up in part because expressions are often genuinely mysterious. Why, for example, are satisfying meals 'square' rather than any other shape? And how did anyone ever come up with the idea that if you're competent at something you can 'cut the mustard'? Michael Quinion here retells many of the more bizarre tales, and explains their real origins where they're known. This is a fascinating treasure-trove of fiction and fact for anyone interested in language.

Best-selling author, businessman and Senator Feargal Quinn firmly believes every business has the potential to survive and even thrive during a recession. In *Mind Your Own Business*, he uses real-life examples from the first two series of RTÉ television's hit programme, *Feargal Quinn's Retail Therapy*, as well as valuable experiences gained in his fifty-year career in business, to explain exactly how to do it. From the importance of setting the right tone in your business, to placing innovation at the heart of everything you do, responding to your customers' needs and planning for succession in a family-run business, he challenges many of the bad habits that can build up in businesses over the years. Throughout the book, he also provides a range of simple, easy-to-implement steps that owners and managers can take to chart their way out of trouble and achieve success even in challenging times.

In the context of what is commonly referred to as consumer-centric digital economy, personal data has become the new currency which is utilized by consumers to be granted access to seemingly “free apps” within so-called digital zero-price markets. Simultaneously, there are consumers, known as “content creators”, who can generate million-dollar revenues annually. The current understanding of how consumers create and capture value within this new digital economy is scarce and more research is needed to systematically build a basis for creating an understanding of value creation and

capture in the consumer-centric digital economy, based on a consumer perspective. The purpose of this dissertation is consequently to explore how consumers create and capture value within a consumer-centric digital economy. The explorative study also serves to obtain an initial overview of the phenomenon and the widely dispersed literature which spans different research fields. The collected data constitute more than 500 articles in combination with empirical data collected from websites. Based on the current literature, central concepts related to consumer-centric digital economy are explained. These include for instance Web 2.0, user-generated content and the consumerto- business relationship. The different concepts are discussed in relation to each other and a trend analysis shows that these concepts are on the rise and have become increasingly popular. The results show that consumers within the digital economy may take different roles, and some create value as business-oriented consumers (i.e., consumers who have a commercial interest). For instance, they make a business out of their participation in the digital economy. Examples are YouTubers, bloggers or creators in virtual worlds such as Second Life. Another, probably larger category is characterized as traditional consumers, for instance they participate in the digital economy through their use of seemingly “free” apps but do not reap any direct monetary benefits. By sharing their personal data, they take part in value creation in a more passive way. The findings also indicate that the level of control, e.g. determined by whether or not value is created within the digital platform, may characterize the prerequisites for value capture. Based on this, a taxonomy for value creation and value capture by consumers in the digital economy is developed. The study also identifies different business model types for business-oriented consumers. I samband med vad som benämns

konsumentcentrisk digital ekonomi har persondata blivit den nya valutan som används av konsumenter för att få tillgång till tillsynes gratis applikationer inom så kallade digitala nollprismarknader. Samtidigt finns det konsumenter, så kallade innehållsskapare (content creators), som kan generera intäkter som uppgår till flera miljoner euro per år. Den nuvarande förståelsen för hur konsumenter skapar och fångar värde inom denna nya digitala ekonomi är begränsad, varför det behövs mer forskning för att systematiskt bygga upp en grund för att skapa förståelse för värdeskapande och värdeåterföring inom den konsumentcentriska digitala ekonomin utifrån ett konsumentperspektiv. Syftet med denna avhandling är följaktligen att undersöka hur konsumenter skapar och fångar värde inom en konsumentcentrisk, digital ekonomi. Den explorativa studien bidrar också till att ge en initial översikt över fenomenet och den spridda litteraturen som sträcker sig över olika forskningsområden. Datainsamlingen utgörs av mer än 500 artiklar i kombination med empiriska data som har insamlas från webbplatser. Baserat på aktuell litteratur förklaras centrala koncept som relaterar till konsumentcentrisk, digital ekonomi. Dessa koncept inkluderar bland annat Web 2.0, "User-generated content" och "consumer-to-business"-relationen. De olika koncepten har ställts mot varandra och en trendanalys av dem visar att de blivit allt populärare. Resultaten påvisar att konsumenter inom den digitala ekonomin kan ta på sig olika roller, som exempelvis affärsinriktade konsumenter (d.v.s. konsumenter som har ett kommersiellt intresse). Till exempel skapar de affärer utifrån sin delaktighet i den digitala ekonomin. Det kan handla om YouTubers, bloggare eller skapare inom virtuella världar såsom Second Life. En annan och troligtvis större kategori kan karaktäriseras som passiva konsumenter, utifrån sin delaktighet i den digitala ekonomin genom användandet av till synes "fria" appar, där de inte

skördar några direkta monetära fördelar. Genom att ge tillgång till persondata så bidrar de på ett passivt sätt till värdeskapande. Resultaten påvisar också att möjligheterna att fånga värdet bestäms av om värdeskapandet har skett inom, eller utanför, ramarna för den digitala plattformen. Baserat på detta, har en taxonomi för konsumenters möjlighet att skapa och fånga värden inom den digitala ekonomin utarbetats. Studien identifierar även olika affärsmodeller för affärsinriktade konsumenter.

The 1990s are becoming known as the decade of privacy invasion due to myriad social and technological developments infringing upon our personal liberty - the information revolution, the growing fears about crime, the ongoing fight over health reform, the gossip-hungry media, the expansion of data banks, and a renewed concern with community standards. As a result, individuals and organized groups are fighting to hold onto independence and freedom against those trying to expose the private sector to public scrutiny. Dr. Gini Graham Scott, a nationally recognized expert on personal privacy and other related issues, gives a shrewd overview of current privacy battles in and out of the courtroom that are directly influencing what can remain private. In addition, this book brilliantly delineates the growing impact of print and broadcast media - citing examples of early privacy skirmishes generated by the press back in the late 1800s, the extensive coverage of government communist witch-hunts and the anti-war/antiestablishment demonstrations and counterreactions during the 1960s, and today's transformation of news agencies into tabloid reporting - to show our current difficulties in controlling the scope and power of the media in their quest for information. Mind Your Own Business skillfully steers an objective course in explaining recent controversial views within these battles, while advocating the right of individuals to maintain as much

personal privacy protection as possible. This book will be of undeniable importance for sociologists, legal and medical professionals, individual rights' advocates, politicians, and anyone who wants the right to control what others do or do not have a right to know about themselves.

"The maverick's way of conducting business forswears the leader as commanding general; it rejects the practice of top-down, authoritative command. Rather, it proposes the leader as catalyst, conscience, and inspirer . . . The true leader sees his job as setting an environment in which new ideas can emerge that neither he nor any other individual anticipated. That leap of imagination, that moment of genuine creativity, can only be inspired by a leader who encourages exploration and shows a willingness to consider a totally new approach." --from Mind Your Own Business The corporate misdeeds of self-serving executives during the high-octane economy of the 1990s have forced many people to rethink the qualities that make a strong leader. For sixty years, Sidney Harman, the chairman and CEO of the world's premier manufacturer of high-end audio equipment, has stood apart from the crowd, building his business the old-fashioned way, by satisfying customers and, in doing so, making a healthy profit. His refreshingly employee-centric, bottoms-up approach to business is the secret of Harman International's continuing success. In Mind Your Own Business, Harman shares his visionary ideas about leadership, providing a welcome contrast to the bad behavior of business leaders recently dominating the news. Harman focuses on creating a culture of personal responsibility throughout his company. He likens his top management team to a jazz quartet that listens to and improvises with one another to create harmony. He stresses the need to do more for workers at every level because employees are the company's most valuable asset. At Harman International, he has established in-house classrooms to teach English, basic math, health, and music, and encourages his employees to pursue their potential. Now a hale and healthy eighty-five, Harman thinks that "an idea a day" is more important than the proverbial apple and that the

Bigger, stronger, better! Russell Anderson has taken the most original and successful lectionary resource in history and improved on it. He has kept all of the traditional features that have made it a classic, such as: overviews of each liturgical season, commentaries compatible with the Revised Common and Roman Catholic lectionaries (plus Lutheran and Episcopal lections for those gradually converting to the Revised Common Lectionary), an introduction to the featured Gospel narrator (Matthew, in Cycle A), theological reflections for exploring the relationships between the texts, and wide margins for note-taking. Instead of stopping there, though, he has added: a 7" x 10" one-size-fits-all format, a suggested sermon title for each week, a Sermon Angle that briefly explicates the theological theme for the day (sometimes providing two or three of them), and illustrative stories in each chapter. Life in Melbourne in the 2080s had become very oppressive, very regimented. Social media had become so automated, so intrusive, and so smart that everyones lives were an open book. No one would ever dare to do anything outrageous or underhanded as they were guaranteed to be found out. It was the publics apathy that led to this society of conformity. Public opinion ruled your life. For three friends, enough was enough! They set out on a series of quests to fight the system and retrieve the one thing that people had forgotten was so dear to themtheir privacy!
