Rising '44 is a brilliant narrative account of one of the most dramatic episodes in 20th century history, drawing on Davies' unique understanding of the issues and characters involved. In August 1944 Warsaw offered the Wehrmacht the last line of defence against the Red Army's march from Moscow to Berlin. When the Red Army reached the river Vistula, the people of Warsaw believed that liberation had come. The Resistance took to the streets in celebration, but the Soviets remained where they were, allowing the Wehrmacht time to regroup and Hitler to order that the city of Warsaw be razed to

the ground. For 63 days the Resistance fought on in the cellars and the sewers. Defenceless citizens were slaughtered in their tens of thousands. One by one the City's monuments were reduced to rubble, watched by Soviet troops on the other bank of the river. The Allies expressed regret but decided that there was nothing to be done, Poland would not be allowed to be governed by Poles. The sacrifice was in vain and the Soviet tanks rolled in to the flattened city. It is a hugely dramatic story, vividly and authoritatively told by one of our greatest historians.

This exciting tour of our Universe explores our current knowledge of exoplanets and the search for another Earth-like planet. Beginning with the basic concepts of planet formation and the composition of the Universe, Stuart Ross Taylor summarises our knowledge of exoplanets, how they compare with our planets and why some stars have better habitable zones. Further sections provide a detailed study of our Solar System, as a basis for understanding exoplanetary systems, and a detailed study of the Earth as our only current example of a habitable planet. The book concludes with a philosophical and historical discussion of topics surrounding planets and the development of life, including why our chances of finding aliens on exoplanets is very low. This is an engaging and informative read for anyone interested in planetary formation and the exploration of our Universe.

Special Operations Task Force in 2004, he quickly realized that conventional military tactics were failing. Al Qaeda in Iraq was a decentralized network that could move quickly, strike ruthlessly, then seemingly vanish into the local population. The allied forces had a huge advantage in numbers, equipment, and training—but none of that seemed to matter. To defeat Al Qaeda, they would have to combine the power of the world's mightiest military with the agility of the world's most fearsome terrorist network. They would have to become a "team of teams"—faster, flatter, and more flexible than ever. In *Team of Teams*, McChrystal and his colleagues show how the challenges they faced in Iraq can be relevant to countless businesses, nonprofits, and organizations today. In periods of unprecedented crisis, leaders need practical management practices that can scale to thousands of people—and fast. By giving small groups the freedom to experiment and share what they learn across the entire organization, teams can respond more quickly, communicate more freely, and make better and faster decisions. Drawing on compelling examples—from NASA to hospital emergency rooms—*Team of Teams* makes the case for merging the power of a large corporation with the agility of a small team to transform any organization.
