The purpose of company management reports is to support the decision makers of an organisation with timely and proper information. The needs and expectations of those individuals regarding management reports are partly subjective. Does the nationality of business decision makers play a role in the way they interpret and use the information put at their disposal in internal company reports? Milena Di Bucchianico looked for an answer to this question. She carried out an empirical investigation on Italian and German decision makers working in the same organisation and with comparable responsibilities, with the purpose to verify if, and how, their national culture influences the contribution of company management reports to their individual decision making process.

economieën ter wereld en blijven andere Afrikaanse landen, zoals Zimbabwe en Congo, ondergedompeld in geweld en armoede? Daron Acemoglu en James Robinson laten overtuigend zien dat het de politieke en economische instituties zijn die het economische succes of falen van een land bepalen; instituties die innovatie en economische groei stimuleren en welvaart en vrede garanderen. De auteurs illustreren hun betoog met tal van fascinerende voorbeelden. Eén daarvan is Korea, een in wezen homogene staat. In Zuid-Korea legt de overheid verantwoording af aan de burgers en heeft de bevolking volop economische kansen; het land is zeer welvarend. Noord-Korea wordt dictatoriaal geregeerd en kent al tientallen jaren onderdrukking en hongersnood. Op basis van vijftien jaar veldonderzoek en historische research hebben de auteurs een nieuwe, overtuigende politiek-economische theorie geformuleerd. Waarom sommige landen rijk zijn en andere arm laat ons met andere ogen naar de wereld kijken en geeft een dieper inzicht in de oorzaken van armoede en rijkdom. Daron Acemoglu is hoogleraar economie aan het MIT. Hij ontving de John Bates Clark Medal. Degenen die deze onderscheiding krijgen, worden beschouwd als belangrijke kanshebbers voor de Nobelprijs. James Robinson is politiek wetenschapper en econoom. Hij is hoogleraar aan Harvard University en een wereldberoemde Latijns-Amerikaan Afrikadeskundige. 'Acemoglu en Robinson hebben een boeiend en zeer lezenswaardig boek geschreven.' Niall Ferguson 'In Why Nations Fail staan zo veel goede dingen, dat ik onmogelijk alles kan opnoemen.' Charles C. Mann 'Acemoglu en Robinson hebben een belangrijk boek geschreven, dat het verdient te worden gelezen door politici en economen waar ook ter wereld.' Het Financieele Dagblad 'Waarschijnlijk leest u net als ik dit boek in één keer uit en neemt u het daarna nog vaak ter hand.' Jared Diamond, auteur van Zwaarden, paarden & ziektekiemen

The eleventh edition of Multinational Financial Management is a comprehensive survey of the essential areas of the international financial market environment, including foreign exchange and derivative markets, risk management, and international capital markets and portfolio investment. Designed for upper-level undergraduate and masters-level courses in international finance and management, this textbook offers readers a conceptual framework for analyzing key financial decisions of multinational firms. The authors both explain and simplify multinational financial management by illustrating how its basic principles share the same foundation as domestic corporate finance. Assuming no prior knowledge of international economics or finance, this substantially revised new edition builds upon the fundamental principles of domestic financial management to examine the unique dimensions of international finance. Readers are presented with a solid theoretical knowledgebase for examining decision problems, as well as practical analytical techniques that clarify the often-ambiguous guidelines used by international financial executives. All the traditional areas of corporate finance are explored from the perspective of a multinational corporation, focusing on elements rarely encountered in domestic finance such as multiple currencies, segmented capital markets, and political risks of nationalization or expropriation.

This book addresses three main dimensions of risk management in emerging markets: 1) the effectiveness of risk management

practices; 2) current issues and challenges in risk assessment and modelling in emerging market countries; 3) the responses of emerging markets to the recent financial crises and the design of risk management models.

This book is the English edition of the German third edition, which has proven to be a standard work on the subject of risk management. The English edition extends the scope of use to the English-language bachelor's and master's degree courses in economics and for potential use (especially as a reference work) in the professional practice of risk management. The subject of the book is company-wide risk management based on the Value at Risk concept. This includes quantitative and qualitative risk measurement, risk analysis based on the RoRaC and various management tools for risk control. Other topics covered are the peculiarities of the various risk types, e.g. risk management of the effects of climate change, the global financial crisis and risk reporting. The book is rounded off by a comprehensive case study, in which all aspects are summarized. The volume is thus an indispensable standard work for students and practitioners. Globalization has been under extreme pressure in the wake of the financial crisis. Multinational firms are weighing the costs and benefits of international scale and scope, and are increasingly under pressure to hire local, to source local, and to pay taxes domestically. At the same time global competitive pressures have intensified. This book reviews international business practices from the multinational firm perspective, and provides pathways forward concerning

competitiveness and sustainability in global markets. What sets this book apart from others is that the benefits and pitfalls of globalization are addressed. Chapter coverage focuses on the functional areas of the business and how they are impacted by international expansion. Practical case studies supplement chapter coverage and highlight both positive and negative developments in the global business arena. Readers should expect to be challenged on what will be the limits of the multinational firm in the future, and how multinational firms can continue to prosper while at the same time adhere to sustainable business initiatives. Equally useful to both undergraduate and graduate students of international business as well as professional development programs, *Global Business: Competitiveness and Sustainability* provides a necessary tonic for dealing with today's troubled seas of globalization.

Work more effectively and gauge your progress along the way! This Study Guide is designed to accompany Shapiro's *Foundations of Multinational Financial Management*, 5th Edition. It contains detailed chapter outlines and a number of solved questions and problems. Now updated and reorganized, Alan Shapiro's *Foundations of Multinational Financial Management*, 5th Edition, emphasizes broad concepts and practices, and provides a clear conceptual framework for analyzing key financial decisions in multinational firms. The text treats international financial management as a natural and logical extension of the principles learned in the foundations course in financial management. Thus, it builds on and extends the valuation framework provided by domestic corporate finance to account for dimensions unique to international finance.

Edição revista e ampliada. Esta segunda edição da obra *Finanças e Gestão de Riscos* tem como preocupação fundamental a melhoria da sua utilização através da introdução de vários exemplos aplicativos e da aproximação à realidade das *Finanças e Riscos Internacionais*. Neste sentido, também foram desenvolvidos vários casos práticos adicionais, colocados no final de cada capítulo.
