

N3 Industrial Electronic Paper April 2014

This massive collection includes all important letters, speeches, interviews, press conferences, and public papers on Woodrow Wilson. The volumes make available as never before the materials essential to understanding Wilson's personality, his intellectual, religious, and political development, and his careers as educator, writer, orator, and statesman. The Papers not only reveal the private and public man, but also the era in which he lived, making the series additionally valuable to scholars in various fields of history between the 1870's and the 1920's. -- Publisher.

We are in the midst of a digital revolution - until recently, the majority of appliances used in everyday life have been developed with analogue technology. Now, either at home or out and about, we are surrounded by digital technology such as digital 'film', audio systems, computers and telephones. From the late 1940s until the 1970s, analogue technology was a genuine alternative to digital, and the two competing technologies ran parallel with each other. During this period, a community of engineers, scientists, academics and businessmen continued to develop and promote the analogue computer. At the height of the Cold War, this community and its technology met with considerable success in meeting the urgent demand for high speed computing for use in the design and simulation of rockets, aircraft and manned space vehicles. The Analogue Alternative tracks the development, commercialisation and ultimate decline of the electronic analogue computer in the USA and Britain. It examines the roles played by technical, economic and cultural factors in the competition between the alternative technologies, but more importantly, James Small demonstrates that non-technical factors, such as the role of 'military enterprise' and the working practices of analogue engineers, have been the most crucial in analogue's demise.¹ This book will be of interest to students of the history and sociology of science and technology, particularly computing. It will also be relevant to those interested in technical change and innovation, and the study of scientific cultures.

Lists citations to the National Health Planning Information Center's collection of health planning literature, government reports, and studies from May 1975 to January 1980.

Evolutionary theory has been strikingly silent about how employee compensation might differ in an evolutionary framework compared to a static one. This is important because employee compensation is a key measure of economic performance, complementing other measures such as growth and survival. This book argues that the link between entrepreneurship and wages is different in an evolutionary context than in the traditional static analysis, suggesting that, particularly in knowledge-based industries, firms will pay relatively lower levels of employee compensation subsequent to startup. If the firm learns that it is viable, and survives and grows, levels of employee compensation will rapidly rise.

Presents 12,860 entries listing scholarly publications on Greek studies. Research and review journals, books, and monographs are indexed in the areas of classical, Hellenistic, Biblical, Byzantine, Medieval, and modern Greek studies.,

but no annotations are included. After the general listings, entries are also indexed by journal, text, name, geography, and subject. The CD-ROM contains an electronic version of the book. Annotation copyrighted by Book News, Inc., Portland, OR

Global Arbitration Review's The Guide to Energy Arbitrations is an essential desk-top reference tool for energy companies, their advisers and arbitrators, bringing together a number of pre-eminent authors and pulling together the latest and best approaches to the myriad issues confronted in today's energy disputes. J William Rowley QC of 20 Essex St, acts as General Editor, editors are Doak Bishop of King & Spalding and Gordon Kaiser, with contributions from leading firms across the world. The book has 18 chapters split into 4 sections: I. Investor-State Disputes in the Energy Sector II. Commercial Disputes in the Energy Sector III. Contractual Terms IV. Procedural Issues in Energy Arbitrations. "e;The Guide to Energy Arbitration is a very useful and unique contribution to the literature in the area...it...assembles the views and insights of leading counsel and arbitrators on many of the key issues and trends in the energy arbitration world. It should be a valuable guide to energy companies and their internal and external counsel, in addition to being of interest to commercial and litigation lawyers generally."e; - Glenn Zacher, Partner, Stikeman Elliot

Publishes in-depth articles on labor subjects, current labor statistics, information about current labor contracts, and book reviews.

"This book deals with Web 2.0 and how social informatics are impacting higher education practice, pedagogical theory and innovations"--Provided by publisher.

Issues for 1973- cover the entire IEEE technical literature.

Includes entries for maps and atlases.

Bottled and Packaged Water, Volume Four in The Science of Beverages series, offers great perspectives on current trends in drinking water research, quality control techniques, packaging strategies, and current concerns in the field, thus revealing the most novel standards in the industry. As consumer demand for bottled and packaged water has increased, the need for scientists and researchers to understand how to analyze water quality, safety, and control are essential. This all-encompassing resource for research and development in this flourishing field covers everything from sensory and chemical composition, to materials and manufacturing. Presents a detailed analysis and sensory characteristics of water to foster research and innovation Provides the latest technological advancements and microbiological characterization methods in the field Includes regulatory tools for beverage packaging to help industry personnel maintain compliance
