Twelve Ways create a thousand tangled paths. Hatched from an egg but unable to shift into dragon form, Jathen is a Moot among the Tazu. His rightful throne is forbidden him because of his transformative handicap, and neither his culture nor his religion offer acceptance of his perceived flaws. Driven by wounded anger, Jathen strikes out across the vast world beyond Tazu borders, desperate to find a place where he feels accepted and whole. Though he travels with the most trusted of companions, sabotage and conspiracy soon strike his quest. Jathen and his allies must struggle against man and magic alike, at the mercy of forces beyond their ken. As Jathen presses on, his questions of belonging are surrounded by more of identity, loyalty, and betrayal. Where will the path of his destiny lead, and will he follow or fall?

Everyone agrees that discrimination can be a grave moral wrong. Yet this consensus masks fundamental disagreements about what makes something an act of discrimination, as well as precisely why (and hence when) such acts are wrong. In *Discrimination and Disrespect*, Benjamin Eidelson develops illuminating philosophical answers to these two questions. Discrimination is intrinsically wrong, Eidelson argues, when it manifests disrespect for the personhood of those it disfavors. He offers an original account of what such disrespect amounts to, explaining how attention to two different facets of moral personhood — equality and autonomy — ought to guide our judgments about wrongful discrimination. At the same time, however, Eidelson contends that many forms of discrimination are morally impeachable only on account of their contingent effects. The book concludes with a discussion of the moral arguments against racial profiling — a practice that exemplifies how controversial forms of discrimination can be morally wrong without being intrinsically so.

A jaded homicide detective working a serial murder case is teamed up with a new partner—a law enforcer from an alien race. Big-city life in the near future is full of violence and tension for Saigo City homicide detective David Silver. His latest assignment is to track down a serial killer dubbed “Machete Man” because he hacks his victims to pieces. But Silver and his partner Mel Burnett just caught a break: One of Machete Man’s intended victims—an elderly woman who would’ve been number six—escapes. And the killer left some DNA behind. Too bad the bureaucrats in charge have brought in a third wheel to assist the Homicide Task Force. Hailing from a superior race gifted with advanced technology, the Elaki have come to Earth to advise in everything from politics to medicine to big business—and now, it seems, police fieldwork. Standing seven feet tall with scales that ripple in the breeze, String resembles a stingray and smells like fresh lime. But he’s turning out to be an unexpected asset in a case that’s quickly morphing into something even more sinister: a far-reaching conspiracy that could leave a lot more people dead, including Detective Silver. A twisting, complex crime tale with intriguing characters, including Silver’s DEA- turned-enforcer wife, Rose, and an Elaki named the Puzzle Solver, *Alien Blues* realistically depicts a world in which aliens and humans can coexist.

Using reconstrutive ideas available in classical Indian original works, this book makes a departure in the style of modern writings on Indian moral philosophy. It presents Indian ethics, in an objective, secular, and wherever necessary, critical manner as a systematic, down-to-earth, philosophical account of moral values, virtues, rights and obligations. It thereby refutes the claim that Indian philosophy has no ethics as well as the counter-claim that it transcends ethics. It demonstrates that moral living proves that the individual, his society and the world are really real and not only taken to be real for behavioral purposes as the Advaitins hold, the self is amoral being a non-agent, moksa is not a moral value, and the Karmic theory, because of involving belief in rebirth, does not fuarantee that the doer of an action is also the experiencer of its results, contrary to what is commonly held, and Indian ethics can sustain itself even if such notions are dropped. Rajendra Prasad calls Indian ethics organismic because, along with ethical concerns, it also covers issues related to professions, politics, administration, sex, environment, etc. Therefore, in one format it is theoretical and applied, normative and metaethical, humanistic and non-humanistic, etc., of course, within the limits of the then cognitive enquiry.
