An introduction to the theory and practice of optometry in one succinct volume. From the fundamental science of vision to clinical techniques and the management of common ocular conditions, this book encompasses the essence of contemporary optometric practice. Now in full colour and featuring over 400 new illustrations, this popular text which will appeal to both students and practitioners wishing to keep up to date has been revised significantly. The new edition incorporates recent advances in technology and a complete overview of clinical procedures to improve and update everyday patient care. Contributions from well-known international experts deliver a broad perspective and understanding of current optometric practice. A useful aid for students and the newly qualified practitioner, while providing a rapid reference guide for the more experienced clinician. Comprehensive and logical coverage detailing the full spectrum of optometric practice in one volume. Succinctly covers the basics of anatomy, physiology, pharmacology, investigative techniques and clinical management of common eye conditions to provide key topics likely to be met in clinical practice. Discusses the full range of refractive correction, from spectacles and contact lenses to surgical treatment. Includes chapters on the management of special populations, including paediatric, elderly, low vision and special needs patients. Heavily illustrated throughout with key diagrams and images to support the text. Complete restructuring of contents into three sections: basic sciences, clinical techniques and patient management. Full colour throughout with over 400 illustrations.

Many new chapters reflecting the changes in optometric practice and technology over the last 20 years, including new imaging and diagnostic procedures and methods of ocular treatment and refractive correction. Now includes internationally renowned authors from around the world. Details a full range of refractive and management approaches for patient care.

LIFE Magazine is the treasured photographic magazine that chronicled the 20th Century. It now lives on at LIFE.com, the largest, most amazing collection of professional photography on the internet. Users can browse, search and view photos of today's people and events. They have free access to share, print and post images for personal use.

Thoroughly revised and updated, this popular book provides a comprehensive yet easy to read guide to modern contact lens practice. Beautifully re-designed in a clean, contemporary layout, this second edition presents relevant and up-to-date information in a systematic manner, with a logical flow of subject matter from front to back. This book wonderfully captures the 'middle ground' in the contact lens field ... somewhere between a dense research-based tome and a basic fitting guide. As such, it is ideally suited for both students and general eye care practitioners who require a practical, accessible and uncluttered account of the contact lens field. Outlines a rational clinical approach to modern contact lens fitting - practical advice for the clinic and the classroom Logical structure and systematic layout, with relevant chapters grouped into coherent sections for easy reference Up-to-date for accurate information Chapters are contextualised through cross-referencing - helping to reflect the relative importance of different topics Provides an 'historical time line' of contact lens development and explains the current global situation Explains how contact lenses are fabricated, designed, manufactured and measured Reviews the scientific principles that underpin the clinical application of contact lenses New chapter on daily disposable contact lenses. Contributing authors comprising optometrists, ophthalmologists, dispensing opticians, industry experts, researchers and clinicians – all of whom are true international leaders in their sub-specialty areas. Many new line diagrams and clinical photographs to illustrate, inform and explain the concepts outlined in the text. Special consideration is given to the most popular lens replacement systems – daily, two-weekly and monthly. Extensive appendices to assist chair-side decision making in everyday practice. Efron Grading Scales for Contact Lens Complications. Evidence-based approach with numerous up-to-date references at the end of each chapter.

Job Hunter's Sourcebook pulls together all the research and resources needed for a successful job hunt into one central place. Included in this edition are 13,867 entries -- entries may appear in multiple sections. Part One profiles 216 high-interest professional and vocational occupations, from accountant and aircraft mechanic to sports official and stockbroker. A Master List of Profiled Professions lists alternate, popular, synonymous, and related job titles and links them to the jobs profiled, providing quick access to information sources on specific occupations by all their variant names. Entries contain complete contact information and are arranged by type of resource. Part Two serves as a clearinghouse in organizing the wide-ranging information available to today's job seeker. It features such topics as resume resources, alternative ways to work, and opportunities for a diverse work force. Sources of Essential Job-Hunting Information addresses 32 employment topics, such as resume writing, interviewing skills, employment issues for disabled workers, working from home, and electronic job search information. Each category features a multitude of sources, including reference works, online and database services, software programs, and more. Entries contain complete contact information. Also included is The Index to Information Sources which alphabetically lists all of the publications, organizations, electronic resources, and other sources of job-hunting information.

How to package, market and sell yourself. Networking, mass mailings and using the telephone. Questions to expect during your interview. Job hunting blunders to avoid.

Primarily a bibliography and directory, this volume lists reference books, periodicals, AV materials, online services, software, and

other resources to assist in job-hunting for 155 occupational categories. It features placement and referral services, associations, agencies, joblines, and computer databanks.
