People go to church every Sunday hoping to hear a life-giving word from the Lord but often find that they have to make do with either the dry crust of cognitive sermons or the empty calories of emotional exhortations. This book provides preachers with the tools to feed their flock with hearty sustenance. Using real-life sermon examples from across Asia that reflect issues facing Asian Christians, Maggie Low builds a picture of a sermon as a body, taking you step-by-step

through guidelines for what this body needs to come alive. Whether you are a beginner or an experienced preacher, you will learn to preach more confidently and relevantly through this skillful integration of biblical theology, homiletical theory, spirituality, and communication skills. Preaching cannot deliver life unless preachers themselves listen to the Word of Life. Dr Low guides the reader to exegete the Scriptures and to listen to God personally so that they can deliver a life-giving word to the hearers.

Advances in Intelligent Vehicles presents recent advances in intelligent vehicle technologies that enhance the safety, reliability, and performance of vehicles and vehicular networks and systems. This book provides readers with up-to-date research results and cutting-edge technologies in the area of intelligent vehicles and transportation systems. Topics covered include virtual and staged testing scenarios, collision avoidance, human factors, and modeling techniques. The Series in Intelligent Systems publishes titles that cover state-of-the-art knowledge and the latest advances in research and development in intelligent systems. Its scope includes theoretical studies, design methods, and real-world implementations and applications. Provides researchers and engineers with up-to-date research results and state-of-the-art technologies in the area of intelligent vehicles and transportation systems. Covers hot topics, including driver

assistance systems; cooperative vehicle-highway systems; collision avoidance; pedestrian protection; image, radar and lidar signal processing; and V2V and V2I communications
