Japanese origami expert Hisao Fukui shows you how to create incredibly realistic paper birds and flying insects, a winged dinosaur and even an undulating Chinese dragon! The easy-to-follow folding instructions and photos in this book present 24 challenging and amazingly lifelike models—from intermediate to complex in terms of their level of difficulty. The 24 unique models in this book include: The Swan—The multilayered wings and body give this familiar model a major three-dimensional upgrade The Crane—Far from traditional, this crane rests on its built-in platform, and has an optional open wing configuration that can double as a fancy box Peacocks—One with tail feathers stowed neatly behind, and another with its tail fan proudly displayed The Swallow—Its distinctive bifurcated tail is on display in a kinetic diving pose The Crested Kingfisher—The artfully modeled eye of this hunter appears to be on the lookout for its next meal Stink Bug—there's nothing foul about this instantly recognizable shield-shaped insect model Beetles—A Horned Beetle with unfurled wings and a Rhinoceros Beetle with an intimidating spiky head Flying Chinese Dragon—Segmented and supple, this ancient symbol of power and good fortune is poised to pounce The Dragonfly—This incredibly detailed form is the most challenging model here, but the spectacular results are well worth the effort And many more!

"This engaging romp will be a great way to initiate conversations about diversity, tolerance, and acceptance."—Booklist (starred review) In the spirit of favorites like *Stick & Stone* and *Spoon* this warmhearted and hilarious picture book tells the story of a highly unusual group of friends and is stunningly illustrated by Samantha Cotterill. Meet Hudson, a hippo. Fran, an earthworm. And Jean, a lightbulb. They have one thing in common: a profound appreciation for rhinos. So, they form a Secret Rhino Appreciation Society, in which a key activity is wearing paper horns. (Sometimes this results in a fire. That's what happens when a lightbulb wears a paper horn.) But when they meet their first real, live rhino and ask her to do rhino-y things, she doesn't want to charge or snort—she's a gardener! She is not what the society expected, but can they learn to appreciate her for who she is? This funny, character-driven story explores themes of friendship, expectations, and prejudice.

Jazz Composition and Arranging In the Digital Age is a comprehensive and practical instructional book and reference guide on the art and craft of jazz composition and arranging for small and large ensembles. In this book, veteran composers and arrangers Richard Sussman and Michael Abene combine their extensive years of experience as musicians and instructors to demonstrate how advances in music technology and software may be integrated with traditional compositional concepts to form a new and more efficient paradigm for the creative process. This book builds on material and issues treated in traditional jazz composition and arranging courses, including all the fundamental musical techniques and information associated with jazz arranging and composition instruction. In addition, each chapter of the book also contains specific examples demonstrating the effective utilization of music software as applied to the realization of these techniques. Software is employed both as both a learning tool in the form of examples and exercises, and as a practical tool illustrating how many modern day composer/arrangers are utilizing these techniques successfully in the real world. The book also offers several chapters devoted exclusively to the creative use of music technology and software. The extensive companion website provides listening examples for each chapter as well as enhanced software tips, expanded and additional music examples, and appendices of , basic principles and an expanded recommended listening list for further study.

Flexible in approach and full of colorful examples, this textbook provides a basic introduction to what art is and can be in the lives of people who do not necessarily think of themselves as "artists." You will be taught about a variety of art themes, genres, materials, and processes that appeal to novice art makers. The lessons are organized by themes of general subject matter or media. Options are available for work in mixed media, crafts, photography and digital media, as well as in traditional drawing or painting media. After picking a theme of particular interest to you, look next at the four strands of lessons presented in that thematic unit. Moving from left to right, select one lesson from each consecutive strand and complete that lesson. Because each lesson builds upon previously presented knowledge and developed skill, as you progress through four lessons, one from each strand, you should grow in your understanding of art concepts, meanings, and processes, while also improving your art making skills. Completing this course will help you develop a new appreciation for the power and possibilities of art learning, by understanding better the art others create, as well as making it yourself.
