Stop crunching numbers and start truly serving your clients Integrative Advisory Services is the CPA, accounting professional and bookkeeper's guide to the future. As technology paves the way for increased self-reliance and DIY financial services, much of the traditional data entry tasks of accounting professionals and bookkeepers will be reduced. Yet, nothing can replace the human side of the client-advisor experience and the desire to improve your clients' businesses with financial information. Technology will continue marching on, so accounting professionals must adapt to the changing marketplace to thrive in this new paradigm. This book shows you how to provide the kind of value that technology cannot: human connection. Rather than simply reporting data, today's accounting professionals have an opportunity to take a much more active role in their clients' business by analyzing the story behind the numbers, understanding both operations and finance, and guiding the client toward the outcomes they need. Creating an ongoing relationship throughout the year allows you to be proactive rather than reactive, and help your client's business at a holistic level. Your business owner and CEO clients can get the numbers from the computer too—but, they come to you for personalized advice, explanations, and guidance based on their unique situation and financial needs. This book shows you how to take on more of an advisory role and become a critical component of your client's success. Spend less time crunching numbers and more time advising clients Become an integral part of the client's decision-making process Provide real value by clearly communicating financial data analysis Become the strategic partner your client cannot do without Cloud technology, machine learning, and artificial intelligence are not the death knell for financial advisors; in fact, they're the opposite—they do the number crunching for you, leaving you more time to provide the personal guidance that no computer could. As the financial advisory industry evolves, Integrative Advisory Services is your real-world guide to adapting and thriving.

VAT and Government Departments is intended to be both a reference manual and a practical guide for those managing VAT in Government Departments, their advisers and key suppliers. Government Department VAT has recently been the subject of an HMRC consultation and review with new guidance published in 2015 (consolidated with revised NHS guidance), making this book timely. Public sector organisations must be registered for VAT where they engage in “economic activities”, especially where there is any competition with the private sector. There are special rules for Government Departments (and the NHS) under section 41 VAT Act 1994 known as the contracted-out services or COS rules (in relation to non-business activities) and Value Added Tax itself, governed by the VAT legislation (in relation to business activities). To understand

VAT in a Government Department context it is essential to understand the fundamental duality in the tax in relation to the public sector. This is often overlooked and because in certain situations VAT can apparently be recovered in both contexts COS eligibility to recover and input tax entitlement on VAT incurred can be confused. Many of the areas covered in the text are complex in themselves and VAT and Government Departments does not attempt to examine all possibilities in all circumstances or to reproduce the full technical guidance or statute. The objective is to identify all of the issues in the tax relevant to Government Departments and in a logical analysis, explain these from a compliance perspective and in relation to the organisational activities of Government Departments (providing further references where appropriate if more detailed information is required). VAT & Government Departments is based on published HMRC and Treasury guidance and policy and on current case law and legislation in force as at 30th April 2015.

Published annually in December, Payroll Accounting covers the latest developments in payroll tax law, wages, payroll operations, employment practices, and hospital insurance.
