Harvard Business School's Michael Roberto draws on powerful decision-making case studies from every walk of life, showing how to promote honest, constructive dissent and skepticism; use it to improve decisions; and align organizations behind those decisions. Learn from disasters like the Space Shuttle Columbia and JFK's Bay of Pigs Invasion, from successes like Sid Caesar and Bill Parcells, from George W. Bush's decision-making after 9/11. Roberto complements his compelling case studies with extensive new research on executive decisionmaking. Discover how to test and probe a management team; when 'yes' means 'yes' and when it doesn't; and how to build real consensus that leads to action. Gain important new insights into managing teams, mitigating risk, promoting corporate ethics, and much more.

Understand American politics from past to present American Government: Roots and Reform - 2015 Presidential Election 13/e helps students view the issues facing the United States today through an historical lens. By presenting coverage of the origins of American government in tandem with material on contemporary political structures and behaviors, the authors help students see how what happened in the past can be used to understand what measures should be taken in the future. In order to boost student engagement with key concepts, the 2016 Presidential Election Edition incorporates coverage of contemporary issues that dominate today's headlines, as well as the most up-to-date data.

All of the workbooks in the new MyPolitics Series allow instructors to bring the current political season right into the classroom, making it relevant, engaging, and assignable to students. The first in the series, The 2008 Presidential Campaign Workbook provides dynamic, easy-to-assign week-by-week interactive exercises -- for the entire fall semester -- that help readers follow, research, and participate in the 2008 presidential election in real-time. The exercises within the workbook utilize a wealth of internet resources to draw students into active engagement with the events of the 2008 presidential campaign as they unfold. For instance, as students prepare to view the

At last, a readable, authoritative and comprehensive book for students, readers and practitioners in print and digital publishing. Publishing guides the reader through the history of publishing and the main issues facing the industry today. Among these are legal conundrums, cultural conflicts, trade practices, publishing within and across sectors, editorial requirements, the challenge of electronic publishing, making your ideas count in print, rationalization and the growth of corporate publishing cultures. The result is an exciting one stop guide, written with flair and aplomb. Packed with helpful real-world examples and illustrative interviews this practical resource leaves no stone of the publishing industry unturned.

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. This text uses the cultural appeal of “lists” and “rank orders” as a pedagogical tool applied to American government. Each chapter presents a list of

the top things a student should know about that topic, and then carefully and accessibly explores each of the items in the list. The lists contained in the text are used to teach introductory students what many scholars agree are the key, core aspects of American government. There is something people seem to find irresistible about lists and rank orders. There is also something almost unseemly or dangerous about them. This text uses both of these factors—the appeal and problems of “lists” and “rank orders”—as a pedagogical tool. The reader is asked to approach the lists critically and to think about what they might add to the list, what they might remove from the list, what they find problematic about the rank order, and so forth. Consequently, the lists serve to draw the students into the topic, to help them learn more about American government, and to use their critical thinking skills to critique the content and order of the lists. In a typical semester, it is nearly impossible to teach someone everything they can and should know about a topic as broad as American government and politics. Therefore, the two primary goals of this text are to (a) give introductory students the basic tools necessary to understand American government and politics in a format that is appealing and (b) in so doing giving them the background necessary to put current events and enduring questions into context.

HR managers are under intense pressure to become strategic business partners.

Many, unfortunately, lack the technical skills in financial analysis to succeed in this role. Now, respected HR management educator Dr. Steven Director addresses this skill gap head-on. Writing from HR's viewpoint, Director covers everything mid-level and senior-level HR professionals need to know to formulate, model, and evaluate their HR initiatives from a financial and business perspective. Drawing on his unsurpassed expertise working with HR executives, he walks through each crucial financial issue associated with strategic talent management, including the quantifiable links between workforces and business value, the cost-benefit analysis of HR and strategic financial initiatives, and specific issues related to total rewards programs. Unlike finance books for non-financial managers, *Financial Analysis for HR Managers* focuses entirely on core HR issues. ¿ More than ever before, HR practitioners must empirically demonstrate a clear link between their practices and firm performance. In *Investing in People*, Wayne F. Cascio and John W. Boudreau show exactly how to choose, implement, and use metrics to improve decision-making, optimize organizational effectiveness, and maximize the value of HR investments. They provide powerful techniques for looking inside the HR "black box," implementing human capital metrics that track the effectiveness of talent policies and practices, demonstrating the logical connections to financial and line-of-business, and using

HR metrics to drive more effective decision-making. Using their powerful "LAMP" methodology (Logic, Analytics, Measures, and Process), the authors demonstrate how to measure and analyze the value of every area of HR that impacts strategic value.

There has been immense worldwide excitement about the potential of Bottom of the Pyramid (BoP) businesses to help impoverished societies escape poverty. Unfortunately, many BoP firms are locked in a "survival trap" that keeps them small, inefficient, and unprofitable. Now, Eric Kacou identifies breakthrough business models, operational techniques, and leadership approaches that can help BoP businesses grow rapidly, successfully, and profitably. Drawing from his immense on-the-ground experience in Africa's most challenging business environments, Kacou shows how companies can overcome the Survival Trap mindset that breeds dependence, mistrust, and failure. Next, he takes readers inside the Rwandan metamorphosis: the economic miracle that CNN's Fareed Zakaria calls Africa's biggest success story. Kacou shows how to address the needs of all core stakeholders. He concludes with integrated recommendations for local entrepreneurs, global businesses, governments, and international organizations: guidance that can truly launch a "virtuous cycle" of prosperity creation. For all entrepreneurs, policymakers, NGO professionals, and leaders who want to make BoP businesses work.

Appropriate for all courses in deploying or managing service-centric datacenters, architectures, and IT infrastructures, as well as many courses focused on emerging trends in enterprise information technology. Students entering tomorrow's IT organizations will be called upon to dramatically increase efficiency, utilization, reliability and flexibility-while reducing cost, staff requirements, and complexity at the same time. A new generation of virtualized, service-centric IT architectures are emerging to address these challenges, with Sun's N1 architecture at the forefront. This book thoroughly explains Sun's N1 vision, strategy, architecture, and products, showing how N1 can address tomorrow's most urgent IT challenges. Next, it walks students through the entire process of preparing, architecting, and implementing data center infrastructure that realizes the N1 vision and drives unprecedented business value. Along the way, the authors demonstrate how to maximize strategic flexibility, while optimizing infrastructure, enterprise applications, and data centers. The book concludes with a start-to-finish case study of N1 implementation in one of the world's most demanding business and technical environments: that of a telecommunications service provider. Part of the highly respected Sun BluePrints Series.
