Through the years, I have noticed that many people have lost many things such as; marriages, break-up of friendships, etc. I feel that it is because of bad character. I feel a need to reach out to those who need to build a better character; to make themselves better. There is a need for one to behave oneself in a manner to be an example to their family, or to those that are around them. One should take time to be a better person. Therefore, one should try and study hard to build their character. In my study, I feel that an early age should begin to build a good character. There should be a place for developing Christian character. Sunday school seems to be the place. Sunday-school teaching is spiritual work. It means soul culture. When the Sunday school pupil has been won to Christ, the work has been, but fairly begun. Everything must now be done to help the pupil to form habits of Christian living. The prayer life must be strengthened; Bible Study must be encouraged; and the graces of the spirit must be acquired. Self-mastery must be won.

Despite an abysmal "success rate," practitioners still use reparative therapy in an attempt to turn gays and lesbians straight. This text exposes the pitfalls that should be considered before gays embark on this journey that typically leads nowhere. • Presents thorough descriptions of the

various reparative therapies, contrasts these techniques with traditional therapy, and exposes the faulty theoretical bases of this form of treatment • Details the author psychiatrist's unsuccessful 5-year-long therapeutic attempt to change his own homosexuality • Provides essential information that gays and their parents need to know before embarking on what the author feels is a futile course of changing sexual orientation. The content will enlighten politicians and reparative therapists themselves as well • Supplies an essential, informed counterpoint to the existing literature on reparative therapy

Authorship's Wake examines the aftermath of the 1960s critique of the author, epitomized by Roland Barthes's essay, "The Death of the Author." This critique has given rise to a body of writing that confounds generic distinctions separating the literary and the theoretical. Its archive consists of texts by writers who either directly participated in this critique, as Barthes did, or whose intellectual formation took place in its immediate aftermath. These writers include some who are known primarily as theorists (Judith Butler), others known primarily as novelists (Zadie Smith, David Foster Wallace), and yet others whose texts are difficult to categorize (the autofiction of Chris Kraus, Sheila Heti, and Ben Lerner; the autotheory of Maggie Nelson). These writers share not only a central motivating question – how to move beyond the critique of the author-subject – but also a way of answering it: by writing texts that merge theoretical concerns with literary discourse. Authorship's Wake traces the responses their work offers in relation to four themes: communication, intention, agency, and labor.

On Being a Person A Multidisciplinary Approach to Personality Theories Wipf and Stock Publishers

Why is it so difficult to find the time to help others? When Seb Hunter became aware of a nagging ache in the place where his soul ought to be, he embarked on a two year odyssey of

volunteering - with hilarious results. He collects litter, teaches pensioners how to use the internet, works at Oxfam (where he meets Gladys, his septuagenarian nemesis), mans a steam train line, becomes a star DJ on hospital radio, visits prisoners, and runs a very long way for charity... But will his quest for self-improvement be successful? *How to Be a Better Person* is the tale of a cynic's attempt to become a better person by helping others. For nothing. It's a volunteering call-to-arms! Oh no it's not! Well it is, sort of...

It is with great pleasure that I write this preface for Or Li's book, which addresses the venerable and vexing issues surrounding the problem of whether death can be a harm to the person who dies. This problem is an ancient one which was raised long ago by the early Greek philosopher Epicurus, who notoriously argued that death is at no time a harm to its 'victim' because before death there is no harm and after death there is no victim. Epicurus's conclusion is conspicuously at odds with our prereflective and in most cases our post-reflective-intuitions, and numerous strategies have therefore been proposed to refute or avoid the Epicurean conclusion that death cannot be an evil after all. How then are we to account for our intuition that death is not just an evil, but perhaps the worst evil: that may befall us? This is the key issue that Or Li addresses. Or Li's book explores various alternative approaches to the complex and difficult issues surrounding Epicurus's notorious argument and provides a defence of the intuitively plausible conclusion that death can indeed be a harm to the person who dies. This challenge to Epicurus's claim that death is never a harm to the person who dies is developed by way of a detailed exploration of the issues raised not only by Epicurus, but also by his many successors, who have responded variously to the challenging issues which Epicurus raised.

From the Introduction: The approach of this text will be multidisciplinary: psychologists, philosophers, theologians, and ethicists grappling with what it means to be a person. This volume will not attempt to provide a comprehensive history of psychology but will instead focus on selected representatives of various paradigms of psychology: from the first systematic psychologist, Aristotle, through psychology's development as an empirical science, and to recent developments in family systems theory. It will especially emphasize a social-relational-spiritual view of the self: namely, human relations to God and to others are essential to humanity. Ó

Learning is a lifelong process and we are the result of our own learning. But how exactly do we learn to be a person through living? In this book, Peter Jarvis draws together all the aspects of becoming a person into the framework of learning. Considering the ongoing, "nature versus nurture" debate over how we become people, Jarvis's study of nurture - what learning is primarily about - builds on a detailed recognition of our genetic inheritance and evolutionary reality. It demonstrates the ways in which we become social human beings: internalising, accommodating and rejecting the culture to which we are exposed (both primarily and through electronic mediation) while growing and developing as human beings and people. As learning theory moves away from traditional, single-discipline approaches it is possible to place the person at the centre of all thinking about learning, by emphasising a multi-disciplinary approach. This wide-ranging study draws on established

research from a number of disciplines into the complexities that make us who we are. It will appeal to a wide variety of audiences: those involved in all fields of education, the study of learning and development, human resource development, psychology, theology and the caring professions.

Anchored in his spirit, the various essays in this volume by colleagues and former students of Schmitz examine his thought and the subjects of his teaching.

This book presents a theory of interaction in adult life when the dynamics of careseeking and caregiving are elicited. It sets out a framework for thinking about the way adults interact with one another, particularly when they are anxious, under stress or frightened. Readers expecting a traditional philosophical work will be surprised and delighted by David Walsh's *Politics of the Person as the Politics of Being*, his highly original reflection on the transcendental nature of the person. A specialist in political theory, Walsh breaks new ground in this volume, arguing, as he says in the introduction, "that the person is transcendence, not only as an aspiration, but as his or her very reality. Nothing is higher. That is what *Politics of the Person as the Politics of Being* strives to acknowledge." The analysis of the person is the foundation for thinking about political community and human dignity and rights. Walsh establishes his notion of the person in the first four chapters. He begins with the question as to whether science can in any sense talk about persons. He then examines the person's core activities, free choice and knowledge, and reassesses the claims of the natural sciences. He considers the ground of the person and of interpersonal relationships, including our relationship with God. The final three chapters explore the unfolding of the person, imaginatively in art, in the personal "time" of history, and in the "space" of politics. *Politics of the Person as the*

This book is dedicated to all those persons who seek to break loose from the pains of poverty and seek their financial independence, through owning their own businesses. Whether you are handicapped by insufficient finances or have adequate start-up capital for your business, the same level of discipline and knowledge will be necessary. I am very much aware of the volumes of books that have been written on the subject of Small Business Development and Management. However, I made the conscious decision to take a different approach and share my personal experiences, highlighting the many obstacles I encountered along the way in my more than 50 years of active involvement in the private sector in the Caribbean. The path to achieving success in business begins with a mindset based upon information and education about the implications of business and a passion to succeed. In this age of information technology, there is no lack of information on how to develop a business and take it through its stages to being a successful business is well documented. There is absolutely no room in today's world for trial and error. My objective in this book is to present to my readers a holistic approach to developing and maintaining a

successful business. The information provided herein is not limited only to my personal successes but also my several failures along the way. I wish to address specifically the operations of the MICRO, SMALL and MEDIUM ENTERPRISES (MSMEs) within the private sector which accounts for as much as eighty five (85) percent of the workforce in some countries. The private sector is referred to as the engine of growth but the MSMEs are the engine of Employment. Many governments fail to give the level of support to this vitally important segment of the economy. I invite you to journey with me as we navigate a path towards understanding the peculiarities, intricacies and technicalities of the operations of MSMEs in general but the Caribbean in particular. In spite cultures may differ, Business speaks an international language whether you are in an under developed, less developed or developed country. I am delighted to share my experiences with you and it is my fervent wish that you will take action on whatever ideas that resonate with you – Enjoy! A very close, examining, and often humorous look, into the art and business of being a successful actor. This is a how-to, on "You, Inc."

A crisp and sparkling blend of cognitive science and human behavior that offers meaningful and attainable pathways towards becoming our best selves. Why do we feel like in order to be productive, happy, or good, we must sacrifice everything else? Is it possible to feel all three at once? Without even knowing it, we're doing things everyday to sabotage ourselves and our societies, habits that prevent us from optimizing long term happiness. Where most books imagine solutions that, when enacted, fail to fundamentally improve our lives, Jim Davies grounds his research in cognitive science to show you not only what works, but how much it works. *Being the Person Your Dog Thinks You Are* shows us how we can use science to become our best selves, using resources we already have within our own brains. Davies's book challenges and inspires us to approach the big picture while also staying mindful of

the everyday details in real life. Davies proves why multitasking is bad for you, when a little unmindfulness can be good for you, how to best justify which charities to donate to, and how to hack your brain. The most surprising truth Davies offers us spreads across these pages like wildfire: you too can lead an optimally good life, not through uprooting your life from the ground up, but from adapting your mentality to your given present. A better life doesn't need to look like a massive change—like our beloved dogs who already view us as our best selves, it's already much closer than you think.
