Basic Pharmacology for Nurses, 18th Edition. Known for its impeccably accurate and up-to-date drug content, this best-selling text consistently underscores medication safety as it guides you in applying pharmacology information to the nursing process. Introductory units acquaint you with the basic principles of pharmacology and medication administration, while subsequent body-system units prepare you to apply the nursing process to every major disorder. Clear guidelines cover safe drug handling, the types of drugs used for disorders or to affect body systems, injection and enteral administration, and patient education. From a respected author team, this full-color text also provides an excellent review for the pharmacology questions on the NCLEX® examination. Medication safety is underscored through Medication Safety Alerts and Clinical Pitfall boxes, as well as Do-Not-Confuse and High Alert icons. Unit on medication administration clearly and visually outlines assessment, techniques, procedures, and documentation for safe administration of percutaneous, enteral, and parenteral drugs. Application of the nursing process offers an overview of general principles of nursing care for each disorder as well as specific nursing considerations for the drug treatment. Lifespan Considerations boxes for children and for older adults draw attention to information that would be especially important when giving a specific drug to patients of those age groups. Drug tables clearly outline generic and brand names, availability, and dosage ranges for key medications for each disorder. Clinical Goldmine boxes focus on best practices in the clinical setting. Get Ready for the NCLEX® Examination! section at the end of each chapter covers key points from the chapter as well as review questions to help prepare for course assessments and the NCLEX Examination. Video clips on medication administration procedures provide a visual reference for safe medication administration. Key terms with

Assessment tables include actual questions to help you learn how to effectively phrase questions to patients as well as target physical assessment techniques. Evaluation boxes bring everything together after nursing interventions have been implemented. Patient Teaching boxes help you plan effective teaching by first identifying an outcome, then developing strategies on how to teach, and finally, implementing measures to evaluate learning. Care of the Older Adult boxes highlight key aspects of nursing assessment and care for this growing population. NEW! QSEN scenarios present a clinical situation followed by an open-ended question designed to help you understand and apply these core competencies. NEW! Chapter on professional nursing includes information on QSEN, prioritization, delegation, and professional levels. NEW! Completely revised review questions contain a strong mix of clinical thinking and application-level questions. NEW! Content on the impact of exercise covers its influence on disease reduction, compassion fatigue, lateral violence, cyber bullying, social media implications, caregiver strain, and safe patient handling. NEW! Expanded use of Evidence-Based Practice boxes include a PICO question, summary of the results of a research study, and a description of how the study has affected nursing practice — in every chapter. NEW! Patient-Centered Care boxes address racial and ethnic diversity along with the cultural differences that impact socioeconomic status, values, geography, and religion. These will related to the chapter case studies when possible.
