Topics such as OSCE/OSPE, food adulteration and tips for PowerPoint presentation are also included in the online content.

Basics of Community Medicine is primarily meant for the undergraduate medical students. This field of Medicine is of immense importance to tackle the communicable and non-communicable diseases specifically in the developing countries. Hence, conceptual clarity of this subject is of prime importance for the students. At present, there is no such book available that simplifies the subject matter for the benefit of students to ease their conceptual understanding. This book is a sincere attempt to fill that void. The present book also covers the fundamentals of epidemiology, statistical methods and details related to the Indian National Programmes and Policies on health matters. The first volume of the book deals with general concepts

medical consultant. Though the compiled articles are independent in themselves and were written during a span of more than fifteen years they have a common theme: search for values in the field of health and medicine. The book is primarily addressed to the medical professionals but we are sure it will prove enlightening for lay readers too. entrance examinations of AIIMS. The material is prepared after a thorough scanning of the latest textbooks, journals and research.

Concise Comprehensive Explanatory Solved question paper of AIIMS PGMEER Narender Rohilla About the Author : - Dr. Narender Rohilla, MS (Orthopedics) is working as an orthopedic surgeon in one of the leading hospitals in New Delhi. He studied MBBS and MS (Orthopedics) from PGIMS Rohtak. He has served as a senior resident in JPN Trauma Center AIIMS, New Delhi and has various national and international paper publications to his credit.

This book demonstrates how GIS techniques and statistical methods can be used to emphasise the characteristics of population and its related variables, vis-à-vis care facilities and the status of vector borne diseases, as well as for malaria modeling. Concentrating on the Varanasi district of India, the main aim of the book is to determine and map the density areas of vector borne diseases using GIS techniques. The book explores how health GIS is an important sub-discipline of health science and medical geography, which is traditionally focused on the spatial aspects of disease ecology and health care facility analysis.

Mastering practical's: community medicine is designed to help students prepare for practical examinations.

Document from the year 2017 in the subject Medicine - Epidemiology, , course: MDS, language: English, abstract: This paper deals with Epidemiology of oral cancer.

Precancerous lesions and conditions, primary prevention,

surgical management and other topics will be shown. Oral cancer is one of the ten leading cancers in the world. Globally the age adjusted incidence rates for oral cancer in men varies from 2.2/100000 in Japan to 22.5/100000 in Brazil; and in women from 0.9/100000 in Japan to 17.2/100000 in Bangalore. In south East Asia, it is the leading cancer in males and the third leading cancer in females. For description the following subsites are included in oral cancers:

lip, tongue, gum, floor of mouth, buccal mucosa, palate and other parts of the mouth (ICD-0140, 141, 143, 144, 145) There is considerable international, national, interethnic variation in the distribution of cancer in intraoral sites. Cancer of the buccal mucosa, lower alveolus and the retro molar trigone are grouped together as cancers of gingivo buccal complex and can be aptly called as the Indian oral cancer as they constitute 60% of all oral cancer in India. Tongue and floor of mouth cancers form the bulk of oral cancers in the west.
