This book provides a focused and comprehensive overview of criminal psychology in different socio-economic and psycho-sociological contexts. It informs readers on the role of psychology in the various aspects of the criminal justice process, starting from the investigation of a crime to the rehabilitation or reintegration of the offender. Current research in criminology and psychology has been discussed to understand the minds of various offenders, how to interact with them during investigation and conviction effectively and how to bring about positive changes in various stages of the criminal justice process—investigation, prosecution, incarceration, rehabilitation—to increase the efficacy of the correctional system and improve public confidence in the justice system. It thoroughly addresses the bigger issues of holistically reducing the increase in crime rates and susceptibility in society. Each chapter builds on leading scholarship in this field from Western scholars and supplements these theories with research findings from a South Asian perspective, particularly in the Indian criminal justice system. This book successfully encapsulates the foundations of criminal psychology literature while incorporating interdisciplinary avenues of study into criminal behaviour and legal psychology, bringing into the provincial discourse lacunas of the justice system and avenues for alternative correctional and rehabilitative programs.

De gruwelijke beelden van oorlogen en genocide die we op het nieuws zien geven ons de indruk dat onze tijd de gewelddadigste aller tijden is. Het omgekeerde is waar, laat Steven Pinker zien in *Ons beter ik..* Hoe komt het dat we ons zoveel menselijker gedragen? Ons leven is verbeterd - en zo gaan we indirect andermans leven meer waarderen. En hoe meer we met anderen te maken krijgen, des te meer groeit onderling begrip, zelfs al is dat soms uit egoïsme. Pinker laat zien dat empathie en zelfbeheersing op den duur sterkere eigenschappen zijn dan sadisme en wraak. *Ons beter ik* is een indrukwekkende, onmisbare geschiedenis van de menselijke omgang en een boek voor de eeuwigheid. STEVEN PINKER (Montréal, 1954) is een experimenteel psycholoog, en professor in Psychologie aan Harvard University. Hij schreef over taal en intelligentie in onder andere *Het taalinstinct* (1994), *Hoe de menselijke geest werkt* (1997), *Het onbeschreven blad* (2002) en *De stof van het denken* (2007). Het unieke van Steven Pinker is dat hij zijn antwoorden op zoveel terreinen zoekt: psychologie, taalkunde, evolutiebiologie - en dat maakt hem ook meteen iemand die vanuit veel hoeken op debat en controversie kan rekenen. 'De stof van het denken is een rijk boek waarin Pinker laat zien hoe de werkelijkheid de taal bepaalt en de manier waarop we daarmee als biologische en sociale dieren hebben leren omgaan.' - DE STANDAARD 'Wie op de hoogte wil raken van een fascinerende nieuwe wetenschap, en bovendien graag spannende populair-wetenschappelijke boeken leest, moet zich *Het taalinstinct* niet laten ontgaan.' - TROUW

Honderdduizend jaar geleden leefde de Homo sapiens nog een tamelijk onbekommerd bestaan in een uithoek van het Afrikaanse continent en deelde hij de planeet met ten minste vijf andere menssoorten. Maar op een zeker moment onderging het brein van deze mens een ingrijpende verandering: nu kon hij zich plots verbeelden dat het gras elders wel eens groener zou kunnen zijn, en

dus maakte hij zich op om de wereld te veroveren. In *Sapiens* neemt Yuval Noah Harari ons mee op een fascinerende reis door de geschiedenis van de mensheid. Wie zijn we? Waar komen we vandaan? En hoe zijn we zo geworden als we nu zijn? In zijn aanstekelijke relaas laat Harari ons kennismaken met het meest dominante wezen op aarde: de mens.

Het is nazomer en heet in het Noorse Bergen, heter dan ooit. Opeens verschijnt er een enorme ster aan de hemel. Niemand weet waar hij vandaan komt. En het duurt niet lang voor zich nog meer ongebruikelijke verschijnselen beginnen voor te doen. De morgenster is een roman over het onbevattelijke, over het grote drama gezien door de beperkte lens van het kleine leven. Maar bovenal is het een roman over wat er gebeurt als de duistere krachten in de wereld worden losgelaten. 'Een duivels goede roman. Knausgård's comeback als romanschrijver biedt een uiterst onderhoudende en fascinerende leeservaring.' – Politiken

This important and topical book examines the triangular relationship of China, India and Pakistan through the prism of nuclear deterrence. The author highlights the interplay and role of strategic culture, nuclear weaponisation and deployment, command and control, arms control, non-state actors and foreign policy issues which affect relations between the three countries. With two main purposes—a conceptual investigation into the notion of deterrence, and a study of the theory and practice of limited war—this book: - addresses the strategic, political and military dimensions of the role of nuclear weapons through examples of the only cases of nuclear weapon states having gone into armed conflict—the Cuban missile crisis, the Ussuri river clashes, and the Kargil conflict. - discusses the various pressures exerted on decision makers in the context of the notions of deterrence, the rational deterrence model, and a limited war under a nuclear umbrella. - evaluates all three countries with regard to their strategic culture, the role of nuclear weapons in their military strategy, the nature of public opinion and political rhetoric, responses to the various arms control treaties, and foreign policy choices. Based on a variety of sources, including interviews with key individuals in various sector, this is the first book-length study of the triangular relationship between China, India and Pakistan.

Dat hebben we gehad behoort tot de absolute hoogtepunten uit de literatuur over de Eerste Wereldoorlog. Dichter Robert Graves beschrijft zijn persoonlijke ervaringen aan het front, die tekenend zijn voor de Britse soldaten in de Franse en Vlaamse loopgraven. Behalve een verslag van het oneindig bloedvergieten, de wanhoop en de heuse gekte in het slijk van de loopgraven, is het boek een weergaloos tijdsdocument van de jaren na de oorlog, van 1918 tot 1929. Graves, die

Engeland in 1927 de rug toekeerde, geeft een uiterst venijnige kritiek op talloze politieke en literaire figuren uit zijn omgeving. Hij neemt niet alleen afscheid van de valse heroïek die de officiële oorlogspropaganda typeert, maar ook van Engeland en alles waar dat voor staat. Dat hebben we gehad, waarin Graves zijn verbeelding van de loopgravenoorlog geeft, groeide uit tot een onomstreden klassieker

A world list of books in the English language.

Dementia is an urgent global concern, often termed a widespread 'problem', 'tragedy' or 'burden' and a subject best addressed by health and social policy and practice. However, creative writers can offer powerful and imaginative insights into the experience of dementia across cultures and over time. This cross-disciplinary volume explores how engaging with dementia through its myriad literary representations can help to deepen and humanise attitudes to people living with the condition. Offering and interrogating a wide array of perspectives about how dementia might be 'imagined', this book allows us to see how different ways of being can inflect one another. By drawing on the 'lived' experience of the individual unique person and their loved ones, literature can contribute to a deeper and more compassionate and more liberating attitude to a phenomenon that is both natural and unnatural. Novels, plays and stories reveal a rich panoply of responses ranging from the tragic to the comic, allowing us to understand that people with dementia often offer us models of humour, courage and resilience, and carers can also embody a range of responses from rigidity to compassion. *Dementia and Literature* problematises the subject of dementia, encouraging us all to question our own hegemonies critically and creatively. Drawing on literary studies, cultural studies, education, clinical psychology, psychiatry, nursing and gerontology, this book is a fascinating contribution to the emerging area of the medical and health humanities. The book will be of interest to those living with dementia and their caregivers as well as to the academic community and policy makers.
