Session Initiation Protocol (SIP), standardized by the Internet Engineering Task Force (IETF), has emulated the simplicity of the protocol architecture of hypertext transfer protocol (HTTP) and is being popularized for VoIP over the Internet because of the ease with which it can be meshed with web services. However, it is difficult to know exactly how many requests for comments (RFCs) have been published over the last two decades in regards to SIP or how those RFCs are interrelated. Handbook on Session Initiation

Protocol: Networked Multimedia Communications for IP Telephony solves that problem. It is the first book to put together all SIP-related RFCs, with their mandatory and optional texts, in a chronological and systematic way so that it can be used as a single super-SIP RFC with an almost one-to-one integrity from beginning to end, allowing you to see the big picture of SIP for the basic SIP functionalities. It is a book that network designers, software developers, product manufacturers, implementers, interoperability testers, professionals, professors, and researchers will find to be very useful. The text of each RFC from the IETF has been reviewed by all members of a given working group made up of world-renowned experts, and a rough consensus made on which parts of the drafts need to be mandatory and optional, including whether an RFC needs to be Standards Track, Informational, or Experimental. Texts, ABNF syntaxes, figures, tables, and references are included in their original form. All RFCs, along with their authors, are provided as references. The book is organized into twenty chapters based on the major functionalities, features, and capabilities of SIP.

Because document production can discover written evidence that would otherwise not be available, it is often the key to winning a case. However, document production proceedings can be a costly and time-consuming exercise, and arbitral awards in particular are often challenged on grounds that relate to document production orders. The task of balancing the conflicting interests of the parties in this context is a major responsibility of arbitral tribunals. This book's analysis focuses on whether there exist legal principles on which arbitrators should establish rules of document production in both civil law and common law countries, and shows how international arbitration is affected. The author examines the relevant discretion of arbitral tribunals under US, English, Swiss, German, and Austrian law, and under nine of the most important sets of institutional rules, including the ICC Rules, the LCIA Rules, and the Swiss Rules. The presentation mines case law and legal literature for concepts based on the common expectations of the parties, the legitimate expectations of a party, the duty to balance different procedural expectations of the parties, the presumed intent of the parties, the underlying hypothetical bargain, implied terms, and the arbitrators' discretion. Among the topics and issues investigated are the following: - procedural rules on document production versus procedural flexibility; - how arbitral tribunals can modify the IBA Rules on a case-by-case basis; - discretion granted by legislation in each country covered; - electronic document production; - how to deal with privilege and confidentiality objections; - how to formulate or answer document production requests; - effective sanctions in case of non-compliance with procedural orders of the arbitral tribunal; - what grounds for annulment and non-enforcement a losing party can raise in what countries. Perhaps the greatest benefit of the book is the inclusion of model clauses, commensurate with both civil law and common law expectations. The author explicates the advantages and inconveniences of each model clause, and clarifies the influence of each clause on the efficiency of the proceedings and the enforcement risk. For practitioners, the book not only gives counsel a thorough overview of possible arguments for and against document production, but also assists arbitrators find a way through the jungle of opinions on the interpretation of the IBA Rules. Legal academics will appreciate the author's deeply informed analysis and commentary and the book's contribution to increasing the predictability of arbitral decisions on document production and showing how issues in dispute can be narrowed by tailor-made rules, thus helping to raise the efficiency and reduce the costs of arbitral proceedings.

A guide to legal procedures, principles, and pitfalls provides an explanation of the entire litigation process

The book examines if and to what extent the proliferation of direct military assistance on the request of a recognized government is changing the rules regulating the use of force. Since the end of the Cold War, several (sub)regional organizations in Africa have codified military assistance on request in their respective treaty frameworks. In addition, in countries such as Afghanistan, Iraq, Libya, Mali, Somalia, South Sudan, Syria, and Yemen, internationally recognized governments embroiled in protracted armed conflicts have requested direct military assistance from individual States or groups of States. These requests are often accepted by the other States, and at times the United Nations Security Council, even when the requesting governments have very limited effective control over their territories, lack democratic legitimacy, and are engaged in wide-spread and systematic violations of international human rights, and humanitarian law.0 This book departs from a definition of requested military assistance that refers to the exercise of forcible measures by third-State armed forces or those controlled by an international organisation in the territory of the requesting State. It then examines the authority to issue a request for (or consent to) direct military assistance, as well as the type of situations in which such assistance may be requested?notably whether it can be requested during a civil war (armed conflict). De Wet finishes by examining the important and controversial question of whether, and to what extent, the proliferation of forcible assistance on request is changing the legal framework applying to the use of force in international law.

There's never been a greater likelihood a company and its key people will become embroiled in a cross-border investigation. But emerging unscarred is a challenge. Local laws and procedures on corporate offences differ extensively - and can be contradictory. To extricate oneself with minimal cost requires a nuanced ability to blend understanding of the local law with the wider dimension and, in particular, to understand where the different countries showing an interest will differ in approach, expectations or conclusions. Against this backdrop, GIR has published the second edition of *The Practitioner's Guide to Global Investigation*. The book is divided into two parts with chapters written exclusively by leading names in the field. Using US and UK practice and procedure, Part I tracks the development of a serious allegation (whether originating inside or outside a company) - looking at the key risks that arise and the challenges it poses, along with the opportunities for its resolution. It offers expert insight into fact-gathering (including document preservation and collection, witness interviews); structuring the investigation (the complexities of cross-border privilege issues); and strategising effectively to resolve cross-border probes and manage corporate reputation. Part II features detailed comparable surveys of the relevant law and practice in jurisdictions that build on many of the vital issues pinpointed in Part I.

The Association has long been viewed as the authoritative voice of the academic profession in this regard. The current edition, the eleventh, includes basic statements on academic freedom, tenure, and due process; academic governance; professional ethics; research and teaching; online and distance education; intellectual property; discrimination; collective bargaining; accreditation; and students' rights and freedoms. The new edition has been thoroughly updated and reorganized thematically. Brief historical introductions have been added to each section, along with an introductory essay on incorporating AAUP principles into faculty handbooks. Among the eighteen new reports included in this edition are statements on academic freedom and outside speakers, campus sexual assault, the inclusion of faculty on contingent appointments in academic governance, and salary-setting practices that unfairly disadvantage women faculty.
