Information design is an emerging area in technical communication, garnering increased attention in recent times as more information is presented through both old and new media. In this volume, editors Michael J. Albers and Beth Mazur bring together scholars and practitioners to explore the issues facing those in this exciting new field. Treating information as it applies to technical communication, with a special emphasis on computer-centric industries, this volume delves into the role of information design in assisting with concepts, such as usability, documenting procedures, and designing for users. Influential members in the technical communication field examine such issues as the application of information design in structuring technical material; innovative ways of integrating information design within development methodologies and social aspects of the workplace; and theoretical approaches that include a practical application of information design, emphasizing the intersection of information design theories and workplace reality. This collection approaches information design from the language-based technical communication side, emphasizing the role of content as it relates to complexity in information design. As such, it treats as paramount the rhetorical and contextual strategies required for the effective design and transmission of information. Content and Complexity: Information Design in Technical Communication explores both theoretical perspectives, as well as the practicalities of information design in areas relevant to technical communicators. This integration of theoretical and applied components make it a practical resource for students, educators, academic researchers, and practitioners in the technical communication and information design fields.

Thousands of Iranians fled their homeland when the 1978–1979 revolution ended the fifty-year reign of the Pahlavi Dynasty. Some fled to Europe and Canada, while others settled in the United States, where anti-Iranian sentiment flared as the hostage crisis unfolded. For those who chose America, Texas became the fourth-largest settlement area, ultimately proving to be a place of paradox for any Middle Easterner in exile. Iranians in Texas culls data, interviews, and participant observations in Iranian communities in Houston, Dallas, and Austin to reveal the difficult, private world of cultural pride, religious experience, marginality, culture clashes, and other aspects of the lives of these immigrants. Examining the political nature of immigration and how the originating and receiving countries shape the prospects of integration, Mohsen Mobasher incorporates his own experience as a Texas scholar born in Iran. Tracing current anti-Muslim sentiment to the Iranian hostage crisis, two decades before 9/11, he observes a radically negative shift in American public opinion that forced thousands of Iranians in the United States to suddenly be subjected to stigmatization and viewed as enemies. The book also sheds light on the transformation of the Iranian family in exile and some of the major challenges that second-generation Iranians face in their interactions with their parents. Bringing to life a unique population in the context of global politics, *Iransians in Texas* overturns stereotypes while echoing diverse voices.

"The PR Practitioner's Playbook" - an anatomy of the public relations profession - relies on my experience as a reporter, editor, public relations counselor, and strategic advisor and evaluator. It demonstrates that successful writers practice their craft with poise and eloquence. It is an extension of the author's classroom, which many students call, "Litwin's laboratory for practical knowledge." As former KYW Newsradio colleague Kim Glovas observed, "Larry's voice is the voice of this book." Among those considered mentors - and contributors to this book - are Nick George, former managing editor at ABC Radio News, ABC sportscaster Howard Cosell, KYW Newsradio anchor Bill Bransome, print journalist extraordinaire Everett S. Landers and legendary broadcast journalist Edward R. Murrow. They spent countless hours helping the author hone his skills and encouraging me to be an open, honest, thorough and valid (relevant) communicator. They stressed tangible tools, and such attributes as knowledge, loyalty, judgment, trust, credibility, ethics and integrity. "The Public Relations Practitioner's Playbook" serves as a basic or supplemental text in introduction to public relations and graduate overview courses. It offers a refreshing, down-to-earth approach to which many students are just not accustomed. Strategic advisors refer to it as a "potpourri of proven public relations techniques." The companion CD-Rom contains, among its many tactics, three PowerPoints that summarize the 17 chapters. Cathrine Kellison gives insight into the different roles and functions a producer needs in the field of television and video. Her text is accompanied by interviews with working producers.
