The TV comes with a stand and remote control, and is in perfect condition. The shipping weight of the box is around 64 lbs, and the TV itself weighs in at 46 lbs, 48 lbs with the stand. The TV is wall-mountable via the VESA option, not included. The back of the Samsung Q60A is made of plastic and looks fairly plain but well made and with quality materials. The stand is on the back, removable, making it easy to wall mount the TV. 4K TV definitely is becoming commonplace as the more premium lines of TVs start to transition to 8K. TV technology is moving forward of next-generation delivery, and there is a reason for this. Content creation has moved the technology to make high-quality content, but they go on!

don't do that until consumers can get hardware to view it. Now that 4K TV is commonplace, that means content is available in 4K, and HDTV would need that content to display it. That's why 4K is the norm. So TV like the Samsung Q60A is the display technology for 4K content. That being said, this isn't the same as Samsung's QLED technology which has always been used. Of course, the Samsung Q60A isn't the same panel technology as its bigger and more expensive brother, but it's a lot of fun for that reason. While it doesn't hold up to the next tier a QN800A is by side, if you've never experienced something like a QN800A, then you won't really know the difference. Setting the Q60A up next to a TCL or Hisense comparable TV, and you will see that difference. Ready to explore new features and know your device better? The Samsung Galaxy S21 5G tested on Geekbench has a Snapdragon 888 processor paired with 8GB of RAM. Everything works under the control of Android 11. Of course, maybe with the new One UI 3.1 overlay. This update is also expected to hit the manufacturer's old smartphone. Geekbench results obtained by Samsung Galaxy S21 5G smartphones are not charming. In single core testing, Snapdragon 888 played more than a thousand points. However, in the multi-core benchmark it is close to 3,000 points. By comparison, Apple's 14 of the 12 iPhones generate about 1500 and 4000 points here. Expect better results in the latest version of the phone. The new phone is expected to come with exynos 2100 or Snapdragon 888 processor, depending on the country. Rumor has it the S21 and S21+ will have major telephoto cameras, ultrawide, and 12 megapixels. In turn, the Galaxy S21 Ultra will feature a 108 megapixel main sensor, another 12 megapixels with an ultrawide lens, plus two 10 MP sensors with 3x and 10x optical zoom. The Galaxy S21 and S21+ should also look similar in other aspects: a flat screen with Full HD + resolution and a refresh rate of 120 Hz, resizing only - 6.2 and 6.7 inches, respectively. In the meantime, the Ultra variant will maintain a display with curved edges from its predecessor: we expect to see a 6.8-inch panel with WQHD+ resolution and 120 Hz support. There is another difference on the S21 Ultra: it will be the only new phone with S Pen support; there will be no internal space to load

the pen, and it is necessary to use a cloak to store it. Samsung is believed to be closing its Note line in 2021 and focusing on folding phones with S Pen, such as the Galaxy Z Fold.
