A Behind-the-Scenes Look At NASA's incredible Journey to the Moon Space journalist and insider Nancy Atkinson weaves together the riveting story of NASA's mission to complete "the greatest adventure on which humankind ever embarked." This incredible account is a keepsake celebrating some of the most important and dramatic events in modern history. Told through over 60 personal interviews and oral histories, as well as personal photographs, this tribute to the men and women who made the Apollo 11 mission a reality chronicles the highs and lows that accompanied the race to the Moon: the devastating flash fire that killed the crew of Apollo 1; the awe of those who saw their years-in-the-making contributions to space exploration blast off from Cape Canaveral; the knuckle-biting descent of Apollo 11 to the lunar surface; a near-catastrophic event on the crew's flight home; the infectious excitement and jubilation across the world after the astronauts returned safely to Earth. These little-known stories of the dedicated engineers, mathematicians and scientists in the 1960s reveal the "hows" of the Apollo missions and bring to life the wonder and excitement of humanity's first steps on the Moon.

De lange weg naar de vrijheid is de beroemde autobiografie van een van de grootste mannen van de twintigste eeuw. Nelson Mandela beschrijft de lange weg die hij heeft moeten afleggen van onwetende jongen tot charismatisch staatsman. Dit is het verhaal van misschien wel de wonderbaarlijkste omwenteling in de geschiedenis, verteld door de man die het allemaal heeft meegemaakt en in gang gezet. Het verhaal van Mandela, door Mandela.

Using empirical evidence from the coastal district of Kenya, an area with a long history of private land ownership, this report challenges the key assumptions of the proponents of land individualization. The author points to the many dysfunctions associated with land privatization, and reinforces the growing critique that customary land tenure is far more complex and flexible than its critics are prepared to concede.

This study documents a crucial dimension of the resistance of Nigerian civil society to a repressive and monumentally corrupt military state in the late 1980s and 1990s in Nigeria. Employing a neo-Gramscian theoretical framework, the study relates how a section of the media defied censorship laws, outright bans, incarceration and the assassination of opposition figures, to prosecute the struggle for democracy. It captures the tensions and contradictions between a pliant section of the media which sought to legitimise the state and a critical section of the same media which, in alliance with radical civil society, invented rebellious outlets to carry on the struggle against dictatorship. The study seeks to make fresh departures by documenting not only the role of the national media in the throes of democratic struggle, but that of the international media whose role was influential in the years studied. Finally the report offers empirical proof of the mechanisms by which a vibrant civil society can curb the ravages of a predatory state in an African country. Book jacket.

"The Niger delta region of Nigeria which is at the heart of the country's oil industry, has a long history of struggles for self-determination dating back to the early years of the 20th century. In the 1980s and 1990s, these struggles, unfolding as they did within the context of military authoritarianism and structural adjustment, took the form of widespread agitation for greater control by local communities of the revenues accruing to the Nigerian state from exploration and extraction of oil."

"This study attempts to capture the transformations in ethnic minority identity politics in the oil-producing areas of the Niger delta. In doing this, attention is simultaneously drawn to the factors informing the shift from peaceful agitation to violent protest as well as the dynamic of decay and renewal in the various ethnic minority movements that are active in the delta. It is suggested that part of the solution to the crisis in the delta will involve not only a thorough-going restructuring of the Nigerian state but also the re-orientation of the

mode of operation of the giant oil multinationals in order to make them both more sensitive and accountable to the local communities."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world.

The magazine that helps career moms balance their personal and professional lives.

In this inspiring book, Anne Bouie details her work with underachieving urban youth and their families at Project Interface, a math and science enrichment program, where she developed a unique approach to raising achievement. Bouie argues that rather than identifying deficits and dysfunctions in the family, a more effective method would focus on strengths and build on the inherent resilience of the community. She describes the design and implementation of this collaboratively organized, community-based after-school enrichment program that worked. Her insights are a valuable tool for any educational or youth program interested in fostering lasting academic success. Book Features include: Testimonials from youth, staff, and parents who participated in a successful after-school program. Indicators for effective and ineffective implementation based on a field-tested model. Indicators to help motivate and enable students to put forth effort and try, in spite of having failed in the past. Strategies to engage families and community members. Insights for policymakers and practitioners who may wish to start a program or assess an existing one.

For more than 40 years, Computerworld has been the leading

source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

While the study of networks has grown exponentially in the past decade and is now having an impact on how archaeologists study ancient societies, its emergence in the field has been dislocated. This volume provides a coherent framework on network analysis in current archaeological practice by pulling together its main themes and approaches to show how it is changing the way archaeologists face the key questions of regional interaction. Working with the term 'network' as a collection of nodes and links, as used in network science and social network analysis, it juxtaposes a range of case studies and investigates the positives and negatives of network analysis. With contributions by leading experts in the field, the volume covers a broad range: from Japan to America, from the Palaeolithic to the Precolumbian. Los Angeles magazine is a regional magazine of national stature. Our combination of award-winning feature writing, investigative reporting, service journalism, and design covers the people, lifestyle, culture, entertainment, fashion, art and architecture, and news that define Southern California. Started in the spring of 1961, Los Angeles magazine has been addressing the needs and interests of our region for 48 years. The magazine continues to be the definitive resource for an affluent population that is intensely interested in a lifestyle that is uniquely Southern Californian.

Based on a decade of field research undertaken mainly in the north and central areas of Namibia since 1993, this

report poses questions about fundamental purposes of music-making.

This report is based on field work carried out in the Akyem Abuakwa area of the forest region of Ghana, a section of the country rich in agricultural land, gold, and diamonds. Through the field work which was undertaken and the empirical material generated, the author attempts to chart the processes and patterns of differentiation connected to land and land use in contemporary Ghana.

This report summarizes the results of the fourth and final round of interviews carried out among informal sector women traders in Harare, Zimbabwe as part of a longitudinal study of their conditions of work and livelihood in the context of economic crisis and structural adjustment.

This book tells the story of Apollo 11 and dispels the myth that NASA faked the moon landings. The story is brought to life by exploiting the flight plan, mission report, in-flight transcripts (including conversations among the crew in the spacecraft that were not transmitted) and post-flight debriefing. It features scans recently produced by NASA of the original Hasselblad film. The final chapters discuss what was learned of the moon rocks, and reviews the follow-on missions. The author's impressive expertise and knowledge of the Moon landings shines through and seamlessly unites the myriad details of the mission.
