Between 1867 and 2000, the Canadian government sent over 150,000 Aboriginal children to residential schools across the country. Government officials and missionaries agreed that in order to “civilize and Christianize” Aboriginal children, it was necessary to separate them from their parents and their home communities. For children, life in these schools was lonely and alien. Discipline was harsh, and daily life was highly regimented. Aboriginal languages and cultures were denigrated and suppressed. Education and technical training too often gave way to the drudgery of doing the chores necessary to make the schools self-sustaining. Child neglect was institutionalized, and the lack of supervision created situations where students were prey to sexual and physical abusers. Legal action by the schools’ former students led to the creation of the Truth and Reconciliation Commission of Canada in 2008. The product of over six years of research, the Commission’s final report outlines the history and legacy of the schools, and charts a pathway towards reconciliation. Canada’s Residential Schools: The History, Part 1, Origins to 1939 places Canada’s residential school system in the historical context of European campaigns to colonize and convert Indigenous people throughout the world. In post-Confederation Canada, the government adopted what amounted to a policy of cultural genocide: suppressing spiritual practices, disrupting traditional economies, and imposing new forms of government. Residential schooling quickly became a central element in this policy. The destructive intent of the schools was compounded by chronic underfunding and ongoing conflict between the federal government and the church missionary societies that had

been given responsibility for their day-to-day operation. A failure of leadership and resources meant that the schools failed to control the tuberculosis crisis that gripped the schools for much of this period. Alarmed by high death rates, Aboriginal parents often refused to send their children to the schools, leading the government adopt ever more coercive attendance regulations. While parents became subject to ever more punitive regulations, the government did little to regulate discipline, diet, fire safety, or sanitation at the schools. By the period's end the government was presiding over a nation-wide series of firetraps that had no clear educational goals and were economically dependent on the unpaid labour of underfed and often sickly children.

This unique guide will provide an overview of radical U.S. political movements on both the left and the right sides of the ideological spectrum, with a focus on analyzing the origins and trajectory of the various movements and the impact that movement ideas and activities have had on mainstream American politics. The work is organized thematically, with each chapter focusing on a prominent arena of radical activism in the United States. The chapters will trace the chronological development of these extreme leftist and rightist movements throughout U.S. history. Each chapter will include a discussion of central individuals, organizations, and events as well as their impact on popular opinion, political discourse and public policy. For movements that have arisen multiple times throughout U.S. history (nativism, religious, radical labor, separatists), the chapter will trace the history over time but the analysis will emphasize its most recent manifestations. Sidebar features will be included in each chapter to provide additional contextual information to facilitate increased understanding of the topic.

Decolonizing Universalism argues that feminism can respect cultural and religious differences and acknowledge the legacy

of imperialism without surrendering its core ethical commitments. Transcending relativism/ universalism debates that reduce feminism to a Western notion, Serene J. Khader proposes a feminist vision that is sensitive to postcolonial and antiracist concerns. Khader criticizes the false universalism of what she calls 'Enlightenment liberalism,' a worldview according to which the West is the one true exemplar of gender justice and moral progress is best achieved through economic independence and the abandonment of tradition. She argues that anti-imperialist feminists must rediscover the normative core of feminism and rethink the role of moral ideals in transnational feminist praxis. What emerges is a nonideal universalism that rejects missionary feminisms that treat Western intervention and the spread of Enlightenment liberalism as the path to global gender injustice. The book draws on evidence from transnational women's movements and development practice in addition to arguments from political philosophy and postcolonial and decolonial theory, offering a rich moral vision for twenty-first century feminism. The first notable feature of this book is its innovation: Computational intelligence (CI), a fast evolving area, is currently attracting lots of researchers' attention in dealing with many complex problems. At present, there are quite a lot competing books existing in the market. Nevertheless, the present book is markedly different from the existing books in that it presents new paradigms of CI that have rarely mentioned before, as opposed to the traditional CI techniques or methodologies employed in other books. During the past decade, a number of new CI algorithms are proposed. Unfortunately, they spread in a number of unrelated publishing directions which may hamper the use of such published resources. These provide us with motivation to analyze the existing research for categorizing and synthesizing it in a meaningful manner. The mission of this

book is really important since those algorithms are going to be a new revolution in computer science. We hope it will stimulate the readers to make novel contributions or even start a new paradigm based on nature phenomena. Although structured as a textbook, the book's straightforward, self-contained style will also appeal to a wide audience of professionals, researchers and independent learners. We believe that the book will be instrumental in initiating an integrated approach to complex problems by allowing cross-fertilization of design principles from different design philosophies. The second feature of this book is its comprehensiveness: Through an extensive literature research, there are 134 innovative CI algorithms covered in this book.

A Guide to Eighteenth-Century Art offers an introductory overview of the art, artists, and artistic movements of this exuberant period in European art, and the social, economic, philosophical, and political debates that helped shape them. writings on imperialism as "milestones." In *Imperialism and Its Contradictions*, Kiernan critically addresses the origins, consequences and legacies of modern imperialism and colonialism, discussing the imperial experience in its totality. Sensitive to the tragic and ironic character of human history, Kiernan considers and reflects upon the political, economic and cultural dimensions of the imperial experience and how it has shaped the lives and social orders of Europeans and non-Europeans alike. Issues treated in *Imperialism and Its Contradictions* include the question of the relationship between the rise of capitalism and the making of Europe's overseas empires; the creation of colonial armies and their political uses; the dialectic of imperialism and revolution; the impact of imperialism on European culture; and the social and cultural problems confronting a post-imperial and multicultural Britain. The book also includes Kiernan's discussion of the work of Antonio Gramsci and its implications for the study of imperialism.

We live in a time of dynamic, but generally regressive regime change—a period in which major political transformations and a rollback of a half-century of legislation are accelerated under conditions of a prolonged and deepening economic crisis and a worldwide offensive against the citizenry and the working class. Written by two of the world's leading left-wing thinkers, *Imperialism and*

Capitalism in the Twenty-First Century takes the form of a number of analytical probes into some of the dynamics of capitalist development and imperialism in contemporary conditions of a system in crisis. It is too early to be definitive about the form that capitalism and imperialism -and socialism-might be or is taking, as we are in but the early stages of a new developmental dynamic, the conditions of which are too complex to anticipate or grasp in thought; they require a closer look and much further study from a critical development and Marxist perspective. The purpose of this book is to advance this process and give some form to this perspective.

A transnational study of how settler colonialism remade the Victorian novel and political economy by challenging ideas of British identity.

Recent decades have seen significant shifts in biblical scholarship opening up a range of ways of engaging the biblical narrative - both methodologically (the tools and techniques for engaging the text) and hermeneutically (the perspectives that inform an interpreter's approach to the text and to the interpretative task). It is these shifts that give shape to this introduction and study guide, so that students encounter not only the text of Matthew itself but also its rich lode of recent interpretation. Among aspects of 1st-century life brought to the fore by current

social-scientific methodology are kinship, the honor and shame culture, and masculinity. Gender is another interpretative lens that has characterized the study of the Gospel of Matthew in recent decades and the Guide provides pathways through this rich literature. The guide to Matthew concludes with the most recent turn of the hermeneutical lens, namely an ecological perspective on what is perhaps the best-known text in Matthew, the Beatitudes. This final chapter is an example of how we can enter an old and familiar text like the Gospel of Matthew from yet another new critical direction.

The Kaiju (strange monster or strange beast) film genre has a number of themes that go well beyond the "big monsters stomping on cities" motif. Since the seminal King Kong (1933) and the archetypal Godzilla (1954), kaiju has mined the subject matter of science run amok, militarism, capitalism, colonialism, consumerism and pollution. This critical examination of kaiju considers the entirety of the genre--the major franchises, along with less well known films like Kronos (1957), Monsters (2010) and Pacific Rim (2013). The author examines how kaiju has crossed cultures from its original folkloric inspirations in both the U.S. and Japan and how the genre continues to reflect national values to audiences. Key Concepts in Historical Geography forms part of an innovative set of companion texts for the Human Geography sub-disciplines. Organized around 24 short essays, it provides a cutting edge introduction to the central concepts that define contemporary research in Historical Geography. This account of imperialism explores recent intellectual, theoretical and conceptual developments in imperial history, including interdisciplinary and post-colonial perspectives. Exploring the links between empire and domestic history, it looks at the interconnections and comparisons between empire and imperial power within wider developments in world history, covering the period from the Roman to the present American empire. The book begins by examining the nature of empire, then looks at continuity and change in the historiography of imperialism and theoretical and conceptual

developments. It covers themes such as the relationship between imperialism and modernity, culture and national identity in Britain. Suitable for undergraduates taking courses in imperial and colonial history.

Postcolonialism as a critical approach and pedagogic practice has informed literary and cultural studies since the late 1980s. The term is heavily loaded and has come to mean a wide, and often bewildering, variety of approaches, methods, politics and ideas. Beginning with the historical origins of postcolonial thought in the writings of Gandhi, Césaire and Fanon, this guide moves on to Edward Said's articulation into a critical approach and finally to postcolonialism's multiple forms in contemporary critical thinking, including theorists such as Bhabha, Spivak, Arif Dirlik and Aijaz Ahmed. Written in jargon-free language and illustrated with examples from literary and cultural texts, this book addresses the many concerns, forms and 'specializations' of postcolonialism, including gender and sexuality studies, the nations and nationalism, space and place, history and politics. It explains the key ideas, concepts and approaches in what is arguably the most influential and politically edged critical approach in literary and cultural theory today. Studies of women travel writers have ranged from anecdotal and celebratory accounts to more critical essays on imperialism or the textualization of difference. This book does more. Drawing from the

life and travels of Mary Kingsley, a nineteenth century travel writer and critic of the Crown Colony system, Alison Blunt cogently examines the relationships among travel, gender, and imperialism. Instead of studying either travel generally or women travel writers in the colonial period specifically, Blunt examines both to show how the spatiality and gendering of travel are inseparable. Underlying her examination are debates about women as a focus of historical research, Western women and imperialism, and the place of women in a historiography of geography.

In this increasingly homogenous society, the American Indian Studies Program Guide provides a framework for college educators and administrators to develop degree programs focusing on American Indian studies, with an eye toward creating future leaders for Indian communities. These degree programs are intended to help American Indians gain control of their own educational systems and develop institutions that can help to reverse the alarmingly high dropout rate. This book provides all the tools necessary for college educators and administrators to develop top-notch programs, including:

- \* Diagnostic tests to determine students' level of knowledge
- \* Defined learning goals and objectives
- \* Seminar descriptions
- \* Established grading criteria
- \* Useful outside resources

Six courses make up the interdisciplinary curriculum: The North American Indian, American Indian History, American Indian Law and Federal Policy, American Indian Religion and Philosophy, American Indian Literature, and the History of American Indian Education.
