Since its creation in 1884, Engineering Index has covered virtually every major engineering innovation from around the world. It serves as the historical record of virtually every major engineering innovation of the 20th century. Recent content is a vital resource for current awareness, new production information, technological forecasting and competitive intelligence. The world's most comprehensive interdisciplinary engineering database, Engineering Index contains over 10.7 million records. Each year, over 500,000 new abstracts are added from over 5,000 scholarly journals, trade magazines, and conference proceedings. Coverage spans over 175 engineering disciplines from over 80 countries. Updated weekly.

Bringing together sources from many countries and many centuries, this study critically analyses the growth of nationalism - from medieval ethnic prejudice to the Romantic belief in a nation's "soul". The belief and ideology of the nation's cultural individuality emerged from a Europe-wide exchange of ideas, often articulated in literature and belles lettres. In the last two centuries, these ideas have transformed the map of Europe and the relations between people and government. Tracing the modern European nation-state as the outcome of a cultural self-invention, cross-nationally and historically, Leerssen also provides a new approach to Europe's contemporary identity politics. This study of nationalism offers a startling new perspective on cultural and national identity. National Thought in Europe is the revised English-language edition of Nationaal denken in Europa. Een cultuurhistorische schets (AUP, 1999). For more information on the English and edited edition, see National thought in Europe
