Organisations need to use their information and knowledge resources in an efficient and effective manner. Hence the goal of this manual – which is to help build the ICM strategy development skills of agriculture and rural development organisations in ACP countries. Based on a review of work already done in the area, CTA has developed two publications – this Facilitator’s guide and a User’s manual (see CTA no. 1727). Everything You Need to Start and Succeed in Your Own Venture Trevor Blake built three successful startups and sold them for more than \$300 million. Now he’s written a complete instruction manual that covers everything the budding entrepreneur or existing business owner needs to know to build the career or business of their dreams. Unlike the many theoretical guides out there, this is a practical handbook based on Blake’s wildly successful in-the-trenches experience. It incorporates leading-edge strategies that cover every aspect of running a business — including funding, developing systems, and marketing. Blake presents in-depth insight into managing effectively, maintaining cash flow, and adapting to the changing needs of customers in volatile economic times. One of his most innovative contributions is an emphasis on cultivating the right mindset, and he tells you exactly how to do that. “The secret to success isn’t in the plan,” he writes. “It’s in the person holding it.” His proven methods will give you the confidence to take the entrepreneurial leap and turn your winning idea into an efficient, profitable company.

Smart Things presents a problem-solving approach to addressing designers' needs and concentrates on process, rather than technological detail, to keep from being quickly outdated. It pays close attention to the capabilities and limitations of the medium in question and discusses the tradeoffs and challenges of design in a commercial environment. Divided into two
