la asignatura "Financial Accounting" correspondiente a los primeros cursos del Grado Bilingüe en Administración y Dirección de Empresas. Todos los ejercicios del libro están resueltos de acuerdo a las disposiciones contenidas en el Plan General de Contabilidad (Real Decreto 1514/2007), cuyo objetivo último es el de adaptar la normativa contable española a las Normas Internacionales de Información Financiera (International Financial Reporting Standards) adoptadas por la Unión Europea como lenguaje contable común para sus Estados miembros. En algunos casos, las soluciones de los ejercicios se basan en los tratamientos contables más simplificados previstos en el Plan General de Contabilidad de Pequeñas y Medianas Empresas (PYME), aprobado por el Real Decreto 1515/2007. El objetivo principal de esta obra es presentar un texto didáctico y comprensible que contenga los fundamentos básicos de la disciplina contable, como el método de la partida doble por el que las transacciones se registran en términos de cargos y abonos. Por otra parte, el libro también se centra en el tratamiento contable de las operaciones básicas más habituales realizadas por una empresa relacionadas con varias áreas, tales como compras y ventas, ingresos y gastos, activos no corrientes, existencias, clientes, proveedores, financiación básica, impuesto sobre beneficios, etc. A lo largo del libro se utiliza para la resolución de los distintos ejercicios la versión en inglés del Plan General de Contabilidad (General Accounting Plan) disponible en la página web del Instituto de Contabilidad y Auditoría de Cuentas. El libro también incluye un glosario de términos para ayudar a los estudiantes a entender la terminología anglosajona relacionada con la Contabilidad Financiera
