Special education students often learn about the characteristics of disabilities, but can lack an understanding of the relationship between diagnostic assessment and eligibility for special education services. The Special Educator's Guide to Assessment: A Comprehensive Overview by IDEA Disability Category focuses on the role that assessment plays in the diagnosis of a disability, determination of eligibility for special education services, and education of students with disabilities to provide a meaningful interconnection between assessment concepts and classroom application for teachers.

Authors Tara S. Guerriero, Mary A. Houser, and Vicki A. McGinley want to ensure that future special education teachers have the preparation to provide comprehensive instruction to P-12 students through this text. While special education teachers are often not the ones conducting comprehensive evaluations, it is paramount that they understand their students' individual characteristics, and understand how assessment is used to determine diagnosis and eligibility. Framing the text around The Individuals with Disabilities Act (IDEA) provides students with concrete standards by which all disabilities are evaluated and regulated in our public educational system. Part I introduces the basic topics of assessment, ethics, and assessment types. Part II moves

on to provide diagnostic and eligibility criteria according to IDEA categories that are most commonly diagnosed in an educational setting while Part III describes the criteria for IDEA categories most commonly diagnosed in a medical setting. Features like case studies and sample comprehensive evaluations help bring to life assessment and how it applies in real classrooms.

Learn what effective teachers do to support students with mental retardation in and out of the inclusive classroom! Providing special and general educators with highly effective strategies for enhancing the academic and social skills of students with mental retardation, and offering a pretest, posttest, and key vocabulary terms, this exceptional resource also discusses: Common causes of mental retardation Diagnosing mental retardation Cognitive, academic, physical, behavioral, and communicational characteristics Methods for improving students' functional academic, social, self-care, and work skills Instructional approaches for students with severe disabilities Issues such as prevention of mental retardation and transitioning from school to work The Individuals with Disabilities Education Act (IDEA) of 2004 has placed a renewed emphasis on the importance of the regular classroom, the regular classroom teacher and the general curriculum as the primary focus of special education. This book contains over 100 topics that deal with real issues and concerns regarding the regular classroom and the special education process. These concerns range from requirements for referring a child for an individual evaluation, school discipline, classroom-based assessment, IEP meetings, inclusion and mainstreaming, and various legal requirements relating to IDEA, Section 504 of the Rehabilitation Act of 1973, and the No Child Left Behind act. It stresses the importance that every child with a disability must have goals "to enable the child to be involved in and make progress in the general education curriculum." Other issues interspersed within this text include classroom needs, the planning of individualized education programs, and participation in all aspects of the general curriculum. In order to achieve these goals, support for the regular classroom teacher must be provided so that children with disabilities can be involved in, and make progress in, the curriculum and participate in nonacademic activities.

And what must all teachers do to ensure that students with disabilities and other special needs receive the quality education they're entitled to? In this practical reference, David F. Bateman—bestselling author of *A Principal's Guide to Special Education*—and special education administrator Jenifer L. In *The Teacher's Guide to SEN* Natalie Packer outlines what all teachers need to know about SEN, and provides a range of practical tips and ideas that can be applied in the classroom. One of the key messages of the Special Educational Needs and Disability Code of Practice, first introduced in 2014, is that every teacher is responsible and accountable for every pupil in their class, including those with SEN. So what does this mean in practice for you as a class or subject teacher? Essentially, it requires you to understand every individual's needs, have a range of relevant knowledge and skills and have the confidence to try out some new approaches. This book is your essential guide to meeting these requirements. *The Teacher's Guide to SEN* details the areas of need teachers are most likely to encounter, including: speech, language and communication needs (SLCN); autism (or ASD); moderate learning difficulties (MLD); specific learning difficulties (SpLD), including dyslexia, dyspraxia and dyscalculia; social, emotional and mental health needs; and physical needs, including visual impairment (VI), hearing impairment (HI) and physical disability. It also provides a useful overview of the many potentially unfamiliar acronyms used in SEN. Special educational needs and disability (SEND) is an umbrella terms which covers a varied array of different needs. They may impact upon learning and cognition, behaviour, social interactions, or an individual's ability to access the curriculum and certain activities in the same way as their peers. With the appropriate support, these needs need not be a barrier to learning, as this book demonstrates. *The Teacher's Guide to SEN* offers practical hands-on strategies to ensure high-quality teaching for all, together with key facts, real-life case studies and questions for reflection. The comprehensive advice includes: defining special educational needs; understanding your responsibilities; identifying pupils with SEN and putting support in place as part of the graduated approach; contributing to SEN reviews and education, health and care plans (EHC plans); making reasonable adjustments in the classroom; delivering inclusive, high-quality teaching for all; raising expectations; classroom strategies, focused on feedback, planning, questioning, modelling and scaffolding learning; developing relationships with pupils and their families; effective partnership working with teaching assistants, parents and outside agencies; and tracking and reviewing progress and provision. Relevant to all primary and secondary practitioners, this is an essential point of reference for busy teachers, including trainees, NQTs or indeed any practitioner who would like to refresh their knowledge or gather some new ideas to try in the classroom.

An important feature of the book is realism – the book grows out of the author's own experiences and research. Reviews of the first two editions: "extraordinarily rich in ideas...an essential buy." - TES "an excellent, clearly written work which is full of practical advice, and presented in an easily readable manner. This book is a highly recommended read. Do buy it and see." - Support for Learning "has proved especially influential at practitioner level ... never failing to offer a balanced assessment." - British Journal of Special Education "I have a comprehensive library of books on special educational needs but I use this one more than any other because I find it readable, practical and accessible. It is a useful and informative book both to read cover to cover and to dip into. Although it is based on sound theoretical knowledge, it is clear that Jean Gross is writing from her own experience as a teacher and SEN practitioner." - TES Recent legislation and cutbacks to central support services mean that the responsibility for meeting special educational needs is resting ever more squarely on the shoulders of ordinary classroom teachers. Yet few feel wholly confident in their ability to adapt work within the national curriculum to meet the whole range of needs, or coordinate successful individual education plans for children who, for whatever reason, are not learning as well as they might. This book will increase that confidence. Aimed at busy class teachers, special needs coordinators, heads and teachers in training, it shows how the teacher can build differentiation into planning lessons and schemes of work. It describes workable strategies for managing the most common behaviour difficulties and meeting special needs in language, literacy and mathematics. At a whole school level, it offers practical guidance on reviewing special needs policies, assessment, record keeping, and the management of roles and resources. The focus is on the way in which schools can do a good job in meeting special needs themselves, within the everyday constraints of time, money and energy, and in so doing provide genuinely inclusive opportunities for all children. This edition has been comprehensively updated and rewritten to cover the revised SEN Code of Practice and related legislation, new directions in inclusion and all the major curriculum initiatives now in place in primary schools.
