Opron? For a long time, car design was considered to be anonymous, the designers stood in the shadow of the perception of the design, even though their designs can be found on the roads in millions. This richly illustrated book captures the origin of a profession and maps the development of car design based on a comprehensive introduction and the career biographies of over 200 selected designers who contributed to the design of cars and many different associated products in the USA, Europe, and Japan between 1900 and 2000.

This book describes the technology used for effective sensing of our physical world and intelligent processing techniques for sensed information, which are essential to the success of Internet of Things (IoT). The authors provide a multidisciplinary view of sensor technology from materials, process, circuits, and big data domains and showcase smart sensor systems in real applications including smart home, transportation, medical, environmental, agricultural, etc. Unlike earlier books on sensors, this book provides a “global” view on smart sensors covering abstraction levels from device, circuit, systems, and algorithms.

Few cars in recent years have inspired such devotion among enthusiasts as the BMW M3. Now entering its fifth generation, BMW's compact performance car is recognized worldwide as the benchmark of its type. BMW M3 - The Complete Story looks in detail at the first four generations of the M3, which arrived in the mid-1980s as an E30 'homologation special', intended to

keep BMW ahead of rivals Mercedes-Benz on the racetracks. But the M3 soon became very much more than that. Before long, buyers latched onto its exclusivity and turned it into a status symbol - and BMW was only too happy to exploit that. For all fans of the BMW M3, this book provides the essential background. It is packed with facts and details that make the M3 legend come alive. With over 250 photographs, the book covers: the original E30 M3 of 1986 - from a 'homologation special' to a status symbol; design and development of the E36 M3, including a new 6-cylinder engine and more body choices; the E46 M3 of 2000, with the developed 6-cylinder S54 engine and gearshift advances; racing success for the E90-series M3s, introduced in 2007 with V8 engines; driving, buying and special editions of all the models.

The management of technological innovation (MTI) is one of the most important challenges facing businesses today. Innovation has become the fundamental driver of competitiveness for firms of all sizes in virtually all business sectors and nations. The first edition of this book has become one of the most popular texts for students of innovation and technology management. This new edition sees David Gann and Ammon Salter join Mark Dodgson as authors, drawing on their combined experience of 60 years of researching and teaching MTI. It combines the most relevant theoretical analysis with contemporary and historical empirical evidence to provide a comprehensive, yet concise and readable, guide to the challenges of MTI. By explaining the innovation process the book reveals the broad scope of MTI and its importance for company survival, growth and sustainability. It describes how MTI has to be managed strategically and how

this is successfully achieved by formulating and implementing strategy and delivering value. Chapters provide frameworks, tools and techniques, and case studies on managing: innovation strategy, communities, and networks, R&D, design and new product and service development, operations and production, and commercialization. Based on robust analysis, the book provides a wide range of empirical evidence from a huge diversity of case studies, with around fifty case studies newly written for this edition. It analyses MTI in all parts of the world, in companies large and small, and in services, manufacturing, and resource-based business sectors. This new edition has been fully revised and updated to reflect the latest teaching and research, and to ensure its continuing relevance to the contemporary world of MTI. It will be an important resource for academics, students, and managers throughout the world, is a recommended text for students of innovation and technology management at postgraduate and undergraduate level, and is particularly valuable for MBA courses.
