Briefly traces the history of sanitation and disease, discusses links between water and infectious diseases, cancer, and infertility, and looks at bottled water and water purification

By water logic, a cow doctor becomes a politician. A soldier becomes a flower farmer. A lost book contains a lost future. The patterns of history are made and unmade. Amid assassinations, rebellions, and the pyres of too many dead, a new government forms in the land of Shaftal—a government of soldiers and farmers, scholars and elemental talents, all weary of war and longing for peace. But some cannot forget their losses, and some cannot imagine a place for themselves in an enemy land. Before memory, before recorded history, something happened that now must be remembered. Zanja na'Tarwein, the crosser of boundaries, born in fire and wedded to earth, has fallen under the ice. Now, by water logic, the logic of patterns repeated, of laughter and music, the lost must be found—or the found may forever be lost. Laurie J. Marks teaches at the University of Massachusetts Boston. She is the author of five previous novels, and her first two Elemental Logic novels (Fire Logic and Earth Logic) won the Gaylactic Spectrum Award and received multiple starred reviews. She is a recipient of the Fairy Godmother Award (James D. Tiptree, Jr. Award) and a founding member of Broad Universe.

This text offers detailed studies of eight works of poetry written by Spanish women in the years following the death of Francisco Franco and the evolution of a democratic government. Each chapter shows how each author defines herself both as a woman and a poet by portraying a female figure in the text of the poem.

Focusing on the era in which the modern idea of nationalism emerged as a way of establishing the preferred political, cultural, and social order for society, this book demonstrates that across different European societies the most important constituent of nationalism has been a specific understanding of the nation's historical past. Analysing Ireland and Germany, two largely unconnected societies in which the past was peculiarly contemporary in politics and where the meaning of the nation was highly contested, this volume examines how narratives of origins, religion, territory and race produced by historians who were central figures in the cultural and intellectual histories of both countries interacted; it also explores the similarities and differences between the interactions in these societies. *Histories of Nationalism in Ireland and Germany* investigates whether we can speak of a particular common form of nationalism in Europe. The book draws attention to cultural and intellectual links between the Irish and the Germans during this period, and what this meant for how people in either society understood their national identity in a pivotal time for the development of the historical discipline in Europe. Contributing to a growing body of research on the 'transnationality' of nationalism, this new study of a hitherto-unexplored area will be of interest to historians of modern Germany and Ireland, comparative and transnational historians, and students and scholars of nationalism, as well as those interested in the relationship between biography and writing history.

Ohlmeyer (history, Aberdeen U.) sets out to discover whether Irish statesman MacDonnell (1609-83) deserved, indeed deserves, the dismal reputation he acquired among his contemporaries and has steadfastly maintained amongst historians every since. She traces his career chronologically from his 1635 m

Northern Ireland's problems are rooted in physical and historical geography: small resource base, peripheral location, violent conquest, repression and ruthless emargination of the native population by the Protestant settlers. At the time of partition, many areas already had a Catholic majority, and the Catholic population is increasing faster, thereby undermining the Protestant position. Britain gains no advantage by keeping Northern Ireland. Nevertheless, this solution is not going to be cheap, not merely because of opposition by Protestant loyalists, but also because of the economic weakness of both Irelands. Unlike other books on the subject, this one goes to the heart of the matter: Britain would be serving her own interest by easing reunification of Ireland, albeit gradually and cautiously. In this perspective, the conclusion is that history is inexorably moving beyond Northern Ireland. Audience: European Community administrators and planners, diplomats, politicians, students in Political Science, Economics, History and Geography.

A girl of eighteen espies and becomes infatuated with a handsome member of the church choir. Written entirely in verse, by Celia E. (Celia Emmeline) Gardner (1844-), and copyright 1871. Transcribed from and stylized to emulate the 1871 Carleton edition. 326 pages; 78,000 words.

A riotous journey through America's most controversial, beautifully unapproachable, and abused wilderness -- the Florida Everglades. In December 2000, President Clinton signed into law a \$7.8 billion restoration plan for the Everglades that garnered national attention and has since become America's touchstone for environmental issues. Enter W. Hodding Carter, a man already bemused by the state of Florida and determined to see what, if any, progress has been made with the Everglades. For reasons unclear even to him, this amazing, remote,

mosquito-infested, hard-to-love region has captured Carter's imagination and won't let go. So, for the past few years, Carter has examined the Everglades from all angles -- social, political, cultural, environmental -- culminating in an ungodly canoe trip through the heart of the Everglades. But this being Hodding Carter -- a man who sailed a Viking ship dressed in serge for one book and followed in the footsteps of Lewis and Clark for another -- a canoe trip the length of the Everglades is merely the tip of the iceberg. *Stolen Water* finds him adopting a manatee, and auditioning to be a mermaid at Weeki Wachee Springs -- not enough that he reports on things, he actually has to do them, too, often to hilarious effect. In the end, though, his tireless reporting reveals the Everglades as never before. Not content with merely observing, he also interviews all the key players, from environmentalists to sugar farmers to Senator Bob Graham, and gives them just enough rope to hang themselves. Always humane, often controversial, and highly readable, Hodding Carter has brought to life this murky, alluring place through his powerful eyewitness account and swampy mishaps. *Stolen Water* is narrative nonfiction at its best, from one of our most talented and funny writers.

A father chronicles the circumstances and events surrounding the poisoning and death of his child. This is a true story and includes actual photos taken at the hospital, hospital chart, statements of witnesses, as well as a technical and legal description of the biological murder weapon as it was approved by the County Health Department in 1980. Is murder by contaminated water covered up in Okanogan County? Maybe you can decide after you read this.
