Intestate Succession is the second volume in the Comparative Succession Law series which examines the principles of succession law from a comparative and historical perspective. This volume discusses the rules which apply where a person dies either without leaving a valid will, or leaving a will which fails to dispose of all of the person's assets. Among the questions considered are the following: What is the nature of the rules for the disposal of the deceased's assets? Are they mechanical or is there an element of discretion? Are particular types of property dealt with in particular ways? Is there entitlement to individual assets (as opposed to money)? Do the rules operate in a parentelic system or a system of some other kind? Are spouses treated more favourably than children? What provision is made for extra-marital children, for adopted children, for step-children? Does cohabitation give rise to entitlement? How are same-sex couples treated? Broader questions also arise of a historical and comparative nature. Where, for example, do the rules in intestate succession come from in particular legal systems? Have they been influenced by the rules in other countries? How are the rules explained and how are they justified? To what extent have they changed over time? What are the long-term trends? And finally, are the rules satisfactory, and is there pressure for their reform? As in the first volume, this book will focus on Europe and on countries which have been influenced by the European experience such as Australia, New Zealand, South Africa, the United States of America, Quebec, and the countries of Latin America. Further chapters are devoted to Islamic Law and Nordic law. Opening with a discussion on Roman law and concluding with an assessment of the overall development of the law in the countries surveyed, this book will provide a wider reflection on the nature and purpose of the law of intestate succession.

This book is one of the first to link company law to the law of succession by concentrating on family businesses. It shows that, to understand the legal framework underlying the daily operations of family businesses, one needs legal analysis, empirical data, psychological and sociological knowledge. The book works on the premise that, since many businesses have been founded by families, practitioners need to develop an understanding of the legal background of such businesses and build up experience to be able to create contracts, trusts, foundations and other legal mechanisms to give shape to systems and procedures for the transfer of shares and control within the family. Comparing the national legal order, techniques, and mechanisms in a range of countries, the book examines parallel developments in these fields of law across the world. Finally, it demonstrates the room for companies, shareholders and the members of a family to develop individual solutions within the legal framework for transferring businesses and shares to the next generation.

The Landmark Cases series highlights the historical antecedents of what are widely considered to be the leading cases in a discipline, and seeks to provide contexts in which to better understand how and why certain cases came to be regarded as the 'landmark' cases in any given field. Succession law's long pedigree, near-universal application, immense capacity for human interest stories, somewhat uncertain future in England and Wales, and close connection to demographics make it an ideal candidate for a Landmark Cases volume. The distinguished contributors to this collection consider cases ranging from 1720 to 2017, covering issues such as will-making and interpretation, the position of beneficiaries and personal representatives, testamentary promises, and the extent of testamentary freedom in England and Wales and beyond. The cases are relevant not only to scholars and students of succession law per se, but also those working in fields such as tax, trusts, tort and land law. They raise issues as diverse as class, colonialism, familial dynamics, expectations and obligations, mental health, and the proper roles of the legal profession and the welfare state. The collection will provoke much discussion on what makes a 'landmark' case, as well as on the peculiarities and limitations of the case law method.

This book presents a broad overview of succession law, encompassing aspects of family law, testamentary law and legal history. It examines society and legal practice in Europe from the Middle Ages to the present from both a legal and a sociological perspective. The contributing authors investigate various aspects of succession law that have not yet been thoroughly examined by legal historians, and in doing so they not only add to our knowledge of past succession law but also provide a valuable key to interpreting and understanding current European succession law. Readers can explore such issues as the importance of a father's permission to marry in relation to disinheritance, as well as inheritance transactions and private, dynastic and cross-border successions. Further themes addressed by the expert contributors include women's inheritance rights, the laws of succession for the prince in legal consulting, and succession in the Rota Romana's jurisprudence.

This book explains the urgent necessity to compile a Civil Code and calls for constitutional awareness in compiling that Civil Code, highlighting the need for it to be done in a democratic and scientific manner. It advocates "Pragmatic Methods" as a new approach to compiling a Civil Code of China and shares the author's thoughts on the constitutionality of compiling a Civil Code, explains the object that is to be judged in terms of its constitutionality, and the constitutionality of legal interpretation, of legislative procedures and of legal application. The book also illustrates the author's "mode of the codifying of non-basic laws" for compiling a Civil Code, and includes a detailed discussion on compiling a Civil Code to reveal how many valid laws there are China – a matter that is of vital importance to the compilation of the Civil Code. The Appendix includes statistics on the number of civil cases classified according to causes of actions, based on "Judicial Opinions of China" website, which is the first step of the author's plan to investigate civil customs reflected in judgment documents with the help of big-data analytical methods.

In this long-awaited book—the first in a three-volume work—David M. Perlmutter has co-authored and edited ten essays that introduce relational grammar, a novel conception of sentence structure that offers far-reaching conclusions for universal grammar. The basic ideas of relational grammar can be simply stated. First, grammatical relations such as 'subject of,' 'direct object of,' and 'indirect object of,' are needed to characterize the class of grammatical constructions in the clausal syntax of natural languages, to formulate universals of grammar, and to construct adequate and insightful grammars of individual languages. Second, the range of linguistic variation in word order and case patterns makes it impossible to define grammatical relations in terms of phrase structure configurations or case. Rather, grammatical relations must be taken as primitive notions of linguistic theory. The papers collected here take up the first of these ideas. They lay out the basic theoretical constructs of relational grammar and discuss three areas of grammar—advancement construction, raising, and clause union. In his introduction, Perlmutter discusses each of the papers—most of which are published here for the first time—and places them in the context of the whole of linguistic study.

Freedom of testation allows an individual to make effective on his death dispositions of his property on the event of his death. Dependants' relief legislation in British Columbia and compulsory portion in Germany limit this freedom by providing testator's family members with a portion of the estate. However, out of the two, only the legislation gives courts the discretion to change testamentary provisions, by making them, in some cases, entirely ineffective. A comparative analysis of the application, legal character, history and purpose of the limitations leads to the conclusion that the freedom of testation is significantly more limited under British Columbia's legislation than it is under the German law. The author proposes a solution that increases the freedom, adds predictability and reduces subjectivity of the application of the dependants' relief legislation in British Columbia.

This third volume in a series on Comparative Succession Law concerns the entitlement of family members to override the provisions of a deceased person's will to obtain money or assets (or more money or assets) from the person's estate. Some countries, notably those in the civil law tradition (such as France or Germany), confer a pre-ordained share of the deceased's estate or of its value on certain members of the deceased's family, and especially on the deceased's children and spouse. Other countries, notably those in the common law tradition (such as England, Canada, or Australia), leave the matter to the discretion of the court, the amount awarded depending primarily on financial need. Whichever form it takes, mandatory family provision is both a protection against disinheritance and also, therefore, a restriction on testamentary freedom. The volume focuses on Europe and on countries influenced by the European experience. In addition to detailed treatment of the law in Austria, England and Wales, France, Germany, Hungary, Italy, the Netherlands, Norway, Poland, Scotland, and Spain, the book also has chapters on Australia and New Zealand, South Africa, the United States, Canada, the countries of Latin America, and the People's Republic of China. Some other countries are covered more briefly, and there is a separate chapter on Islamic law. The book opens with accounts of Roman law and of the law in medieval and early-modern Europe, and it concludes with a comparative assessment of the law as it is today in the countries and legal traditions surveyed in this volume.
