Concepts such as e-voting, e-democracy, e-participation, online campaigning, and e-parliament are the most powerful proof of the use of ICTs in political activities, processes, and institutions. E-Parliament and ICT-Based Legislation: Concept, Experiences and Lessons presents a conceptual framework regarding e-parliament and analyzes the impacts of ICTs on the structure of parliament, its functions, relations with other actors, and the legislative process. As a result of the means and opportunities created by ICTs, parliaments have had a chance to simplify and integrate their administrative processes and involve citizens in legislative processes. This book reflects on new understandings, developments, and practices in parliaments within the framework of ICT usage.

Research Paper from the year 2003 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: 1.3 (A), The University of Hong Kong (-), 22 entries in the bibliography, language: English, abstract: This paper examines the concept of eCurrency and how it has been used globally, and then highlights how this could be applied in Hong Kong. The situation in Hong Kong was assessed, and it is believed that Octopus is able to take advantage of its strong brand name and wide use taking its business online to an extended business model, termed eOctopus. The eOctopus model suggests that Octopus becomes an intermediary in online transactions where the users will have the option to set up an online Octopus account on the web. Money will be deducted for online and offline transactions, and money can be added at current Octopus terminals or via Internet banking. It will also allow users to shop and pay bills online. Given the development concerning the introduction of a smartcard (including an eCertificate function) to replace the existing Hong Kong ID card, synergies are expected to exist if Octopus were to work together with the government on this issue. Since every resident in a Hong Kong is required to possess an ID card, Octopus would thus gain in trust and overcome security issues, as expressed by respondents. The Hong Kong government could benefit from this arrangement, since Octopus? technology and know-how regarding smartcards is advanced. If the eOctopus model is implemented in Hong Kong, it could then serve as a global role-model to the rest of the world, making eOctopus a successful eCurrency for online transactions possibly beyond the boundaries of HK.

This book presents the thoroughly refereed joint post-proceedings of three workshops held during the 17th International Conference on Conceptual Modeling, ER '98, in Singapore in November 1998. The 50 revised papers presented have gone through two rounds of reviewing and revision. The book is divided in sections on knowledge discovery, data mining, data and web warehousing, multidimensional databases, data warehouse design, caching, data dissemination, replication, mobile networks, mobile platforms, tracking and monitoring, collaborative work support, temporal data modelling, moving objects and spatial indexing, spatio-temporal databases, and video database contents.

This book explores five important areas where technology affects society, and suggests ways in which human communication can facilitate the use of that technology.Usability has become a foundational discipline in technical and professional communication that grows out of our rhetorical roots, which emphasize purpose and audience. As our appreciation of audience has grown beyond engineers and scientists to lay users of technology, our appreciation of the diversity of those audiences in terms of age, geography, and other factors has similarly expanded.We are also coming to grips with what Thomas Friedman calls the 'flat world,' a paradigm that influences how we communicate with members of other cultures and speakers of other languages. And because most of the flatteners are either technologies themselves or technology-driven, technical and professional communicators need to leverage these technologies to serve global audiences.Similarly, we are inundated with information about world crises involving health and safety issues. These crises are driven by the effects of terrorism, the aging population, HIV/AIDS, and both human-made and natural disasters. These issues are becoming more visible because they are literally matters of life and death. Furthermore, they are of special concern to audiences that technical and professional communicators have little experience targeting - the shapers of public policy, seniors, adolescents, and those affected by disaster.Biotechnology is another area that has provided new roles for technical and professional communicators. We are only beginning to understand how to communicate the science accurately without either deceiving or panicking our audience. We need to develop a more sophisticated understanding of how communication can shape reactions to biotechnology developments. Confronting this complex network of issues, we're challenged to fashion both our message and the audience's perceptions ethically.Finally, today's corporate environment is being shaped by technology and the global nature of business. Technical and professional communicators can play a role in capturing and managing knowledge, in using technology effectively in the virtual workplace, and in understanding how language shapes organizational culture.

Bill Evans (1929-1980) is one of the highest regarded jazz pianists in the history of jazz. His harmonic and rhythmic language in combination with superb taste and technical perfection places him in a category by himself. His style of harmonization and improvisation has been an inspiration to countless pianists as well as other instrumentalists in the field of jazz. This book of original musical studies and analyses by Corey Christiansen and Per Danielsson is designed to help you develop your own personal improvising style. It presents numerous musical lines with chord symbols in the style of Bill Evans, grouped by the harmony they can be used against. The audio play-along provides a rhythm section backup for each of the exercises. To help the player master all keys, each section also has a play-along on the audio that modulates around the circle of fourths. Some of the techniques used in the style of Bill Evans are discussed and examples shown, helping musicians analyze each of the ideas presented, further insuring mastery of these ideas. When assimilated into the student's musical vocabulary, these ideas will help students

create their own original jazz solos. Includes access to online audio.Also available in Japanese from ATN, Inc

Building on the successful approach of the Word 97 book, this edition will have a renewed emphasis on realistic and practical solutions for the business user. The example screens and tasks will all reflect the use of Word in a professional setting. Furthermore, this emphasis means that there will be better use of accomplishing tasks that use combinations of multiple features to achieve a result. The book will include full coverage of the totally revamped Web publishing features that allow HTML to be applied as a standard format. Along with easier Web integration the book will show how to make the best use of the new Web Collaboration Tools that allow simultaneous work on documents. And there will be coverage of the new multilingual editing features of Word. The book will also feature substantial improvements in coverage of current features. For example, the coverage of VBA now better addresses the use of VBA for enhancing the Word environment and saving time. Another example is the improved coverage of customizing Word to best fit the way you work.

This volume examines the basic layers of the standard-based creation and usage of legislation. In particular, it addresses the identification of legislative documents, their structure, the basic metadata and legislative changes. Since mature technologies and established practices are already in place for these layers, a standard-based approach is a necessary aspect of the up-to-date management of legislative resources. Starting out with an overview of the context for the use of XML standards in legislation, the book next examines the rationale of standard-based management of legislative documents. It goes on to address such issues as naming, the Akoma-Ntoso document model, the contribution of standard-based document management to handling legislative dynamics, meta-standards and interchange standards. The volume concludes with a discussion of semantic resources and a review on systems and projects.

Unchain your data from the desktop with responsive visualizations Building Responsive Data Visualization for the Web is a handbook for any front-end development team needing a framework for integrating responsive web design into the current workflow. Written by a leading industry expert and design lead at Starbase Go, this book provides a wealth of information and practical guidance from the perspective of a real-world designer. You'll walk through the process of building data visualizations responsively as you learn best practices that build upon responsive web design principles, and get the hands-on practice you need with exercises, examples, and source code provided in every chapter. These strategies are designed to be implemented by teams large and small, with varying skill sets, so you can apply these concepts and skills to your project right away. Responsive web design is the practice of building a website to suit base browser capability, then adding features that enhance the experience based on the user's device's capabilities. Applying these ideas to data produces visualizations that always look as if they were designed specifically for the device through which they are viewed. This book shows you how to incorporate these principles into your current practices, with highly practical hands-on training. Examine the hard data surrounding responsive design Master best practices with hands-on exercises Learn data-based document manipulation using D3.js Adapt your current strategies to responsive workflows Data is growing exponentially, and the need to visualize it in any context has become crucial. Traditional visualizations allow important data to become lost when viewed on a small screen, and the web traffic speaks for itself – viewers repeatedly demonstrate their preference for responsive design. If you're ready to create more accessible, take-anywhere visualizations, Building Responsive Data Visualization for the Web is your tailor-made solution.
