What did great adventurers eat during their expeditions to the far corners of the world? How did they view the role of food in their survival and wellbeing? What about hikers and backpackers today who set out to enjoy nature, pushing their own boundaries of comfort for adventure. How does food impact their experience? And what do they have in common with pilgrims and soldiers? Food is a significant element of our relationship with nature. Whether a historical expedition or a weekend camping trip, a journey made on foot requires sustenance. Without mastering our relationship with food we would have not been to the South Pole or summited Mt. Everest or expanded to the west of America. However, in the reporting of these expeditions so far food has rarely taken a central role. It is possible to take a different stance and look at our time on trails with food as the leading character. Here, Demet Güzey offers a fun and interesting read on the social and cultural history, developments and challenges in food on trails and in the wild. She explores personal accounts, news articles and anecdotes to highlight how food has accompanied us in mountaineering, desert travel, and pilgrimage, in the army or on the street. From tinned foods to foraging in the wild, worm-infested hardtack to palate-dulling army rations, loss of appetite in high altitude to starvation at the trenches, no stone is left unturned in this tour of how we manage food on foot, and how disasters happen when we do not manage it so well. Readers will delight in both the stories of many of the famous explorations and the more current journeys.

Because relationships are absolutely crucial, Kuhl describes how to build support networks before you even need them and explains how to get actionable feedback that will help you get to the next level—the kind women rarely are afforded. Therapeuten zijn al twee decennia enthousiast over het werken met Schematherapie. De effectiviteit van Schematherapie is hoog en de positieve resultaten zijn internationaal erkend en bevestigd. In de Schematherapie wordt de Gezonde Volwassene gepositioneerd tegenover de kwetsbare kanten en destructieve kanten van de cliënt. In dit boek worden vanuit verschillende disciplines interventies beschreven, die specifiek ontwikkeld zijn voor het vergroten en versterken van de Gezonde Volwassene. Deze interventies komen zowel uit de Schematherapie zelf als uit de Positieve Psychologie en Mindfulness. Deze laatste stromingen winnen gestaag aan populariteit en maken gebruik van inspirerende technieken en begrippen als welbevinden en compassie. De auteurs houden een pleidooi voor een verdere integratie van de Schematherapie en deze nieuwe, krachtgericht werkende stromingen. Hierdoor kan de Schematherapie nog effectiever zijn. De Gezonde Volwassene wordt daarbij niet als modus maar als mens- een kracht in het omgaan met de complexe uitdagingen van het leven. Anne-Marie Claassen en Silvia Pol werken beiden reeds jaren met Schematherapie en hebben zich samen met collega's vanuit verschillende disciplines met name gericht op het beschrijven van de praktische toepassingen van positieve technieken in de (groeps-) schematherapie.
