

The Light In The Glens The Rise And Fall Of The Puffer Trade

As the 13th century dawns, an ancient scroll hidden in the French Pyrenees is rumored to hold shocking revelations about Jesus of Nazareth. To preserve this lost evidence of His teachings, a charismatic Cathar holy woman must defy Rome. Christianity is about to enter its darkest hour and emerge forever changed. Set during the religious persecution and political rivalries of the Albigensian Crusade, this is a fictionalized interpretation of the life of Esclarmonde de Foix, a revered leader of a heretical sect of pacifist mystics called Cathars, or 'Pure Ones.' As the Viscountess of Foix, Esclarmonde ignites the enmity of Pope Innocent III by challenging the Church's venality and corruption. When her fame grows after public disputations with the legates of Rome, the Church retaliates by launching a brutal forty-year war in Occitania that culminates with the nine-month siege of Montsegur, the Cathar Masada. Here is a rich tapestry filled with poignant love stories, monastic corruption, Templar intrigue, troubadour espionage, mysteries of the Holy Grail and the Tarot, and epic siege battles that reshaped the kingdom of France and paved the path to the Reformation. This timely novel about the Cathar Joan of Arc offers a cautionary tale for those who insist that militant theocracy and terror in the name of God could never take root in the modern West. It also challenges traditional beliefs about the origins of Christianity and the controversial role of women in the priesthood.

Over the years, many papers on carbonate diagenesis have been published in *Sedimentology*, the journal of the International Association of Sedimentologists. This volume presents a collection of these papers with a commentary. The emphasis of the book is on the diagenesis of shallow-marine carbonate sediments and the editors have chosen 12 papers which are reproduced in full. To widen the scope of this volume the abstracts for another 16 papers are presented. These provide further examples of diagenetic studies and help to extend the coverage of the book. The reprints and abstracts are divided into three groups, dealing with marine, meteoric and burial diagenesis respectively. Each collection is preceded by a commentary which briefly summarizes the topic and introduces the reprints and abstracts to come.

A review of the role of the puffer in Scottish maritime history, especially that of the West Coast. The study describes the evolution of the puffer from its early roots as a timber built, horse-drawn barge into the vessel which inspired Neil Munro's *Para Handy* tales. Through details from the records of the early companies that eventually joined forces to become Glenlight Shipping, the book tells how the puffers served the communities of Scotland's western seaboard, bringing them essential supplies, shipped mostly from the Clyde. It also tells how this trade suffered and declined as a result of declining populations, improved road transport and the advent of Ro-Ro ferries.
