When we think of "heaven," we generally conjure up positive, blissful images. Heaven is, after all, where God is and where good people go after death to receive their reward. But how and why did Western cultures come to imagine the heavenly realm in such terms? Why is heaven usually thought to be "up there," far beyond the visible sky? And what is the source of the idea that the post mortem abode of the righteous is in this heavenly realm with God? Seeking to discover the roots of these familiar notions, this volume traces the backgrounds, origin, and development of early Jewish and Christian speculation about the heavenly realm -- where it is, what it looks like, and who its inhabitants are. Wright begins his study with an examination of the beliefs of ancient Israel's neighbors Egypt and Mesopotamia, reconstructing the intellectual context in which the earliest biblical images of heaven arose. A detailed analysis of the Hebrew biblical texts themselves then reveals that the Israelites were deeply influenced by images drawn from the surrounding cultures. Wright goes on to examine Persian and Greco-Roman beliefs, thus setting the stage for his consideration of early Jewish and Christian images, which he shows to have been formed in the struggle to integrate traditional biblical imagery with the newer Hellenistic ideas about the cosmos. In a final chapter Wright offers a brief survey of how later Jewish, Christian, and Islamic traditions envisioned the heavenly realms. Accessible to a wide range of readers, this provocative book will interest anyone who is curious about the origins of this extraordinarily pervasive and influential idea.

This book explores how, unlike in the West, the daily religious life of most Chinese people spreads without institutional propagation. Based upon more than a decade of field research in rural China, the book demonstrates the decisive role of rites of passage and yearly festival rituals held in every household in shaping people's religious dispositions. It focuses

on the family, the unit most central to Chinese culture and society, and reveals the repertoire embodied in daily life in a world envisioned as comprising both the “yin” world of ancestors, spirits, and ghosts, and the “yang” world of the living. It discusses especially the concept of bai, which refers to both concrete bodily movements that express respect and awe, such as bowing, kneeling, or holding up ritual offerings, and to people’s religious inclinations and dispositions, which indicate that they are aware of a spiritual realm that is separate from yet close to the world of the living. Overall, the book shows that the daily practices of religion are not a separate sphere, but rather belief and ritual integrated into a way of dwelling in a world envisaged as consisting of both the “yin” and the “yang” worlds that regularly communicate with each other.
