Life is at once wonderful and appalling, beautiful and horrific. Although we can all give meaning to our lives by trying to live well, is there some given meaning to be discovered? Science cannot answer this question, and philosophical arguments leave the issue open. The monotheistic religions claim that the meaning has been revealed to us, and Christians see this is above all in the life, death and resurrection of Jesus. Described by Rowan Williams as 'that rarity, a Christian public intellectual', Richard Harries considers the Christian claim in the context of an in-depth discussion of the nature of evil and how this is to be reconciled with a just and loving God. Drawing on a wide range of modern literature, he argues that belief in the resurrection and hope in the face of death is fundamental to faith, and suggests that while there is no final intellectual answer to the problem of evil, we must all, believer and nonbeliever alike, protest against the world and seek to change it, rather than accept it as it is.

The authors are proud sponsors of the 2020 SAGE Keith Roberts Teaching Innovations Award—enabling graduate students and early career faculty to attend the annual ASA pre-conference teaching and learning workshop. *Classical Sociological Theory, Eighth Edition*, provides a comprehensive overview of the major theorists and schools of sociological thought from the Enlightenment roots of theory through the early 20th century. The integration of key theories with biographical sketches of theorists and the requisite historical and intellectual context helps students to better understand the original works of classical authors as well as to compare and contrast classical theories.

In this book, Phan Le-Ha identifies and discusses four growing self-sustained/sustaining fundamental phenomena in transnational education (TNE), namely (1) the planned, evolving and transformative mediocrity behind the endorsement of English-medium education legitimized by the interactive Asia-the West relationship; (2) the strategic employment of the terms 'Asia/Asian' and 'West/Western' by all stakeholders in their perceptions and construction of choice, quality, rigour, reliability and attractiveness of programs, courses, and locations; (3) the adjusted desire for an imagined (and often misinformed) 'West' among various stakeholders of transnational education; and (4) the assigned and self-realized ownership of English by otherwise normally on-the-margin groups of speakers. A focus on how these phenomena impact questions of identity and desire in TNE is a running theme. The above phenomena are discussed against the backdrop of 'the rise of Asia' sentiment and how this sentiment has played out in interactions and relationships between 'the West' and 'Asia' and among Asian institutions and various entities. Phan Le-Ha's examination of the identified phenomena in TNE has been informed by her multi-layered engagement with the dialectic of the Asia-the West relationship, her critical take on certain pro-Asia and decolonisation scholarship, and her interdisciplinary and multidisciplinary approach to theorise the field and the specific topic under scrutiny. Phan Le-Ha shows that the current Asia chooses (not necessarily by force but largely by will and often with an informed and well-articulated agency) to go with the idea of the West and often desires an affiliation with the West either directly or indirectly, something that is getting more intense in the context of globalization, regionalization, and commercialization of education. The rise of Asia has made the idea of the West even more looked-for in Asia. TNE in Asia, in many ways, is the transforming and dynamic transit point, a layover that facilitates entry into a wanted destination – the West and/or the idea of the West. The West and Asia need one another more than ever in the context of the internationalization and commercialization of higher education. What's more, the West and Asia have hardly ever been mutually exclusive but have rather been in an eventful love-and-obsession relationship with each other. This is the very dialectic proposition that Phan Le Ha takes throughout this book while paying specific attention to transnational higher education in the greater Asian region including the Middle East, following her several research projects conducted in the region since 2005 to date. *Transnational Education Crossing 'the West' and 'Asia'* explores: • English, Internationalisation of Higher Education, and Identity: Increasing Academic Monolingualism and English-only Package • Transnational Education and Dream Realization: From the Philippines to Vietnam, From Afghanistan to Dubai, From Everywhere in Asia to Thailand • Desiring International /Transnational Education: Theorisation of Key Concepts and Next Steps from Here The book will be of interest to researchers in the field of transnational education, Asia education and education policy.

De geest van onze tijd lijkt er een te zijn van vreugdeloze urgentie. In plaats van het verkennen van onze glorieuze geest, zijn we meer geïnteresseerd in technologieën en middelen die ons materieel welzijn bezorgen. Hoewel cultuurpessimisme de mode is, toont Marilynne Robinson dat onze toekomst gelukkig nog genoeg hoop en vertrouwen geeft. In De gegevenheid der dingen weet ze onze huidige maatschappij feilloos te doorgronden en ze laat zien wat humanisme, filosofie, calvinisme, theologie en (angst)cultuur ons gebracht hebben, en wijst ons nieuwe richtingen. Ze vraagt ons eerbied te hebben voor wie en wat we zijn: wezens van belang en waarde, ondanks onze dwalingen en vergissingen.

*The Humanities in Transition* explores how the basic components of the digital age will have an impact on the most trusted theories of humanists. Over the past two generations, humanists have come to take basic postmodern theories for granted whether on language, knowledge or time. Yet Michel Foucault, Jacques Derrida and similar philosophers developed their ideas when the impact of this digital world could barely be imagined. The digital world, built on algorithms and massive amounts of data, operates on radically different principles. This volume analyzes these differences, demonstrating where an aging postmodernism cannot keep pace with today's technologies. The book first introduces the major influence postmodern had on global thought before turning to algorithms, digital space, digital time, data visuals and the concept to digital forgeries. By taking a closer look at these themes, it establishes a platform to create more robust humanist theories for the third millennium. This book will appeal to graduate students and established scholars in the Digital Humanities who are looking for diverse and energetic theoretical approaches that can truly come to terms with the digital world.

*The Ultimate Scholarship Book 2015 Billions of Dollars in Scholarships, Grants and Prizes* Supercollege Llc International borders have become deadly barriers of a proportion rivaled only by war or natural disaster. Yet despite the damage created by borders, most people can't – or don't want to – imagine a world without them. What alternatives do we have to prevent the deadly results of contemporary borders? In today's world, national citizenship determines a person's ability to migrate across borders. *Migration Borders Freedom* questions that premise. Recognizing the magnitude of deaths occurring at contemporary borders worldwide, the book problematizes the concept of the border and develops arguments for open borders and a world

without borders. It explores alternative possibilities, ranging from the practical to the utopian, that link migration with ideas of community, citizenship, and belonging. The author calls into question the conventional political imagination that assumes migration and citizenship to be responsibilities of nation states, rather than cities. While the book draws on the theoretical work of thinkers such as Ernst Bloch, David Harvey, and Henry Lefebvre, it also presents international empirical examples of policies and practices on migration and claims of belonging. In this way, the book equips the reader with the practical and conceptual tools for political action, activist practice, and scholarly engagement to achieve greater justice for people who are on the move. They each work in different places in different locations around the world, and each share their leading edges of how they are making it work for them in their market. Sharing their understanding through self-reporting will be valuable for anyone seeking to apply a coaching approach in their own space. And it's the unique code of each person's practice can better inform the field and the wider market of the realities that everyday practitioners operate in, that go beyond the many limitations of currently approved practice.

This important study introduces the key theories of national identity, and relates them to the broad fields of product, graphic and fashion design. Javier Gimeno-Martinez approaches the inter-relationship between national identity and cultural production from two perspectives: the distinctive characteristics of a nation's output, and the consumption of design products within a country as a means of generating a national design landscape. Using case studies ranging from stamps in nineteenth century Russian-occupied Finland, to Coca-Cola as an 'American' drink in modern Trinidad and Tobago, he addresses concepts of essentialism, constructivism, geography and multiculturalism, and considers the works of key theorists, including Benedict Anderson, Eric Hobsbawm and Doreen Massey. This illuminating book offers the first comprehensive account of how national identity and cultural policy have shaped design, while suggesting that traditional

formations of the 'national' are increasingly unsustainable in an age of globalisation, migration and cultural diversity. Javier Gimeno-Martinez is Lecturer in Design Cultures at the VU University Amsterdam, The Netherlands.

The disciplinary triad of open-access, multimodality, and writing center studies presents a timely, critical lens for discussing academic publishing in a moment of cruciblic change, where rapid technological advancements force scholars and institutions to question what is produced and “counts” as academic writing. Using historiographic, quantitative, and qualitative analysis, Open-Access, Multimodality, and Writing Center Studies sees writing center scholarship as a microcosm of many of the larger issues at play in the contemporary academic publishing landscape. This case study approach reveals the complex, imbricated ways that questions about publishing manifest both within the content of journals, and as related to academics’ perceptions as signifiers of disciplinary visibility, identity, and transformation. More than just reaffirming the conventional wisdom about these changes in publishing—that these shifts are happening and we do not always know how to pinpoint them—Open-Access, Multimodality, and Writing Center Studies suggests that scholars in all fields, compositionists, and writing center practitioners be conscious of the ways they are complicit in maintaining barriers to accessibility and innovation. Chapter 5 of this book is available open access under a CC BY 4.0 license at [link.springer.com](http://link.springer.com).

This volume focuses on the theory and practice of the regenerative development paradigm that is rapidly displacing sustainability as the most fertile ground for climate change adaptation research. This book brings together key thinkers in this field to develop a meaningful synthesis between the existing practice of regenerative development and the input of scholars in the social sciences. It begins by providing an expert introduction to the history, principles, and practices of regenerative development before going on to present a thorough theoretical examination by known theorists from disciplines including sociology, geography, and ethics. A section on regenerative development practices illustrates the need to significantly advance our understanding of how urbanization, climate change, and inequality interact at every scale of development work. Finally, the book ends with a serious consideration of the ways in which integrated systems thinking in higher education could result in a curriculum for the next generation of regenerative development professionals. *Regenerative Urban Development, Climate Change and the Common Good* will be of great interest to students, scholars, and practitioners of regenerative development, climate change, urban planning, and public policy. Presents a comprehensive directory of available college scholarships, along with advice on where to find the best scholarships, how to write a winning essay, compile a resume, get a recommendation and succeed in an interview. This text outlines for the first time a structured articulation of an emerging Islamic orientation to psychotherapy, a framework presented and known as Traditional Islamically Integrated Psychotherapy (TIIP). TIIP is an integrative model of mental health care that is grounded in the core principles of Islam while drawing upon empirical truths in psychology. The book introduces the basic foundations of TIIP, then delves into the writings of early Islamic scholars to provide a richer understanding of the Islamic intellectual heritage as it pertains to human psychology and mental health. Beyond theory, the book provides readers with practical interventional skills illustrated with case studies as well as techniques drawn inherently from the Islamic tradition. A methodology of case formulation is provided that allows for effective treatment planning and translation into therapeutic application. Throughout its chapters, the book situates TIIP within an Islamic epistemological and ontological framework, providing a discussion of the nature and composition of the human psyche, its drives, health, pathology, mechanisms of psychological change, and principles of healing. Mental health practitioners who treat Muslim patients, Muslim clinicians, students of the behavioral sciences and related disciplines, and anyone with an interest in spiritually oriented psychotherapies will greatly benefit from this illustrative and practical text.

Kudos, students! Our team in EasyUni have felt the youth power. As evident in the overwhelming response to our Internship positions - it was a good testament on how students stood up and looked for opportunities, instead of just sitting and waiting for miracles. In this issue, we feature not just one, but two awesome students who have become inspiration to their peers in their own ways. To help educate students, we also feature stories on how to make money now.

Een van de grootste problemen van de economie is de opeenhoping en de verdeling van kapitaal. Dat hangt nauw samen met problemen van ongelijkheid, van concentratie van welvaart en van economische groei. Bevredigende oplossingen voor die problemen waren tot nu toe moeilijk te vinden. Theorieën te over, maar relevant historisch onderzoek was niet voorhanden. In *Kapitaal in de 21ste eeuw* analyseert Thomas Piketty een groot aantal gegevens uit de laatste twee eeuwen en uit twintig landen. Zo weet hij fundamentele economische en sociale processen bloot te leggen. Hij toont aan dat de moderne economische groei en de spreiding van kennis ons in staat hebben gesteld om de ongelijkheid op apocalyptische schaal die Marx had voorspeld te voorkomen. Maar de diepere structuur van kapitaal en ongelijkheid is er in wezen niet door veranderd, zoals we in ons optimisme na de Tweede Wereldoorlog dachten. De belangrijkste oorzaak van de ongelijkheid is de tendens dat de opbrengst op kapitaal groter is dan de economische groei - iets wat nu tot extreme ongelijkheid dreigt te leiden. Het wakkert de onvrede aan en ondermijnt democratische verworvenheden. Het is aan de politiek om die tendens in te tomen. *Kapitaal in de 21ste eeuw* is een buitengewoon ambitieuze onderneming, waarvan de grote waarde alom wordt erkend. Het is een herbezinning op de economische geschiedenis en het dwingt ons de werkelijkheid nuchter onder ogen te zien.

Over the past few years, increased ‘unauthorised’ migrations into the territories of Europe have resulted in one of the most severe crises in the history of the European Union. Stierl explores migration and border struggles in contemporary Europe and the ways in which they animate, problematise, and transform the region and its political formation. This volume follows public protests of migrant activists, less visible attempts of those on the move to ‘irregularly’ subvert borders, as well as new solidarities and communities that emerge in interwoven struggles for the freedom of movement. Stierl offers a conceptualisation of migrant resistances as forces of animation through which European forms of border governance can be productively explored. As catalysts that set socio-political processes into frictional motion, they

are developed as modes of critical investigation, indeed, as method. By ethnographically following and being implicated in different migration struggles that contest the ways in which Europe decides over and enacts who does, and does not, belong, the author probes what they reveal about the condition of Europe in the contemporary moment. This work will be of great interest to students and scholars of Migration, Border, Security and Citizenship Studies, as well as the Political Sciences more generally.

Het oude Rome is belangrijk. De geschiedenis van het rijk, van zijn veroveringen, wreedheid en uitpattingen, is voor ons nog altijd een ijkpunt. Zijn mythen, verhalen, disputen en problemen houden ons nog altijd bezig. SPQR biedt een frisse kijk op de Romeinse geschiedenis door een van 's werelds belangrijkste classici. Mary Beard onderzoekt niet alleen hoe Rome van een onbelangrijk dorp in Midden-Italië uitgroeide tot een wereldmacht die heerste over een gebied van Spanje tot in Syrië, maar ook hoe de Romeinen zichzelf en hun wereld zagen, en waarom dat van belang is tot in onze eeuw. Deze gezaghebbende geschiedenis omspant duizend jaar, en werpt een nieuw licht op veel aspecten van de Romeinse beschaving, van de slavernij en de religie tot het stromend water. Het is het definitieve boek over het oude Rome, verrassend en goedgeschreven.

How did writers convey ideas under the politically repressive conditions of state socialism? Did the perennial strategies to outwit the censors foster creativity or did unintentional self-censorship lead to the detriment of thought? Drawing on oral history and primary source material from the Editorial Board of the Czechoslovak Academy of Sciences and state science policy documents, Libora Oates-Indruchová explores to what extent scholarly publishing in state-socialist Czechoslovakia and Hungary was affected by censorship and how writers responded to intellectual un-freedom. Divided into four main parts looking at the institutional context of censorship, the full trajectory of a manuscript from idea to publication, the author and their relationship to the text and language, this book provides a fascinating insight into the ambivalent beneficial and detrimental effects of censorship on scholarly work from the Prague Spring of 1968 to the Velvet Revolution of 1989.

*Censorship in Czech and Hungarian Academic Publishing, 1969-89* also brings the historical censorship of state-socialism into the present, reflecting on the cultural significance of scholarly publishing in the light of current debates on the neoliberal academia and the future of the humanities.

One of the most debated topics in law and politics is the role that science should play in setting policy. What does it mean to demand that politicians and the People themselves “follow the science” if science deals with questions of fact, not matters of moral or political values? This long-standing controversy has roots ranging from Plato's philosopher-kings to Enlightenment skepticism to modern progressivism and the rise of the administrative state. ‘Science and Liberty’ explores the idea that a constitutional republic provides a fitting role for science while preserving the People's liberty and right to self-government. It examines this topic from five perspectives: American, Historical, Philosophical, Scientific, and Moral. Providing direct access to primary historical sources, ‘Science and Liberty’ contends that America's founders designed a constitution that was predicated on the Enlightenment theory that liberty precedes government and that presupposed the engagement of the People and their representatives at all levels of free debate. Early twentieth-century progressivism was openly hostile to these founding principles in its desire for efficient rule by scientific administrators. However, it is impossible to philosophically ground political and moral values in the findings of science, despite what modern theorists claim. Ultimately, the injunction to “follow the science” demands to substitute the values of “experts” for the values of the People themselves. By illustrating numerous examples from the hard and social sciences, ranging from physics to Biblical criticism to climate science, this book also explains that the People have a role to play in reasonably engaging with and critiquing modern science. ‘Science and Liberty’ will appeal to those interested in a variety of subjects, including law, politics, philosophy, and intellectual history, as well as scientific criticism, particularly from an American perspective. It is written to be accessible for all ages while also engaging with complex issues and sources relevant for those with advanced degrees.

Er zijn dingen die zelfs de liefde niet kan doen. Als de last te zwaar is en te lang aanhoudt, krijgt zelfs de liefde barsten, scheuren, tot zehij bijna breekt en dat soms ook doet. Maar zelfs als zehij in duizend stukjes aan je voeten ligt, wil dat nog niet zeggen dat het niet langer liefde is. br? Yejide hoopt op een wonder, op een kind. Dat is het enige wat haar echtgenoot en schoonmoeder willen en ze heeft alles al geprobeerd: zware pelgrimstochten, medische afspraken, dansen met profeten en vurige gebeden. Als haar schoonfamilie aandringt op een echtgenote erbij, knapt er iets in Yejide. Hoe moet haar huwelijk standhouden onder deze druk? Ze raakt uiteindelijk zwanger, maar tegen een veel hogere prijs dan ze ooit had gedacht.br

This book presents an interpretive, macro-historical, and sociological account of martyrdom. Moving away from the notion of martyrdom as an object of individual behavior and seeing it instead as a significant cultural work performed by communities in the wake of a violent death, it provides a novel interpretation of Western political and religious history. In addition to thus redressing the disproportionate attention given to the concept's relationship to Islam, the author offers a new perspective on two defining historical processes: secularization and the rise of modern sovereignty in the form of the nation-state. An innovative analysis of the role of sacrifice in contemporary culture, which constitutes a timely critique of long-dominant theories of disenchantment and the privatization of religion, *The Ultimate Sacrifice* will appeal to sociologists and social theorists with interests in religion, politics, and the connection between the two.

Het ware verhaal van de scheepsramp die Amerika bij de Eerste Wereldoorlog betrok Uitgeroepen tot het beste non-fictieboek van 2015 door onder meer Kirkus Reviews en Publishers Weekly 'Larson is journalist die non-fictie schrijft als romans, echte pageturners.' - George R.R. Martin (auteur van Game of Thrones) Op 1 mei 1915, terwijl WO I zijn tiende maand inging, was de luxe oceaanstomer Lusitania van New York onderweg naar Liverpool, met een recordaantal kinderen en peuters. Aan boord van het met brons en mahoniehout versierde schip, baadden de opvarenden in luxe. Ze maakten een ontspannen indruk, ondanks dat Duitsland de zee rondom Groot-Brittannië tot oorlogsgebied had verklaard en zelfs een advertentie in Amerikaanse kranten had laten plaatsen met een waarschuwing niet aan boord van dit soort schepen te gaan. Al maanden zaaiden Duitse duikboten dood en verderf in de Atlantische Oceaan. Maar de Lusitania was een van de grootste en snelste schepen van het moment en haar kapitein William Thomas Turner had groot vertrouwen in de ongeschreven regels die gentlemen op zee aanhielden en die er al eeuwen voor zorgden dat passagiersschepen veilig waren voor oorlogshandelingen. Duitsland was echter vastberaden om deze regels niet meer te handhaven en Walther Schwieger, de kapitein van Unterseeboot-20 gaf hier maar al te graag gehoor aan. Wat Schwieger echter niet wist, is dat een ultrageheime tak van de Britse geheime dienst al zijn bewegingen nauwgezet volgde, wat volgens sommigen duidt op een complot om Amerika te betrekken bij WO I. Op 7 mei 1915 werd de Lusitania aan stuurboord geraakt door een torpedo. Binnen 18 minuten was het volledig gezonken, waarbij 1198 van de 1962 opvarenden om het leven kwamen. Erik Larson, die voor zijn eerdere boeken genomineerd werd voor een Pulitzer Award, beschrijft een van de grootste scheepsrampen die ooit plaatsvond zo kleurrijk en spannend dat dit boek leest als een roman. Hij voert het tempo op tot aan de uiteindelijke ontknoping, die zelfs doorgewinterde lezers de adem zal benemen. Erik Larson staat bekend als een van de succesvolste en meest getalenteerde schrijvers van non-fictie. *The Devil in the White City* stond meer dan een jaar in *The New York Times*-bestsellerlijst en ook zijn andere boeken blijven daar vaak maandenlang in staan. In totaal verkocht hij al meer dan 3 miljoen exemplaren van zijn boeken en werd hij genomineerd voor de prestigieuze Pulitzer Award. 'Larson is een van de huidige meesters van narratieve non-fictie.' - *The New York Times* Book Review 'Larson [...] heeft een opmerkelijk oog voor detail.' - *The New York Times* '[Larson] weet levendig de ramp in woorden te vatten, evenals de microkosmos van het schip zelf.' - *The New Yorker* '[Larson is] een fantastische verteller van verhalen.' - Lev Grossman, *TIME* 'Een intrigerend, meeslepend onderzoek naar een legendarische ramp.' - Kirkus Reviews, starred review 'Het verhaal leest als een grade-A thriller.' - Booklist, starred review 'Een meeslepend verslag van een van de meest tragische gebeurtenissen op zee ten tijde van WO I.' - Publishers Weekly
