This book will address the need for a coherent and thorough exploration. Musical Creativity: Multidisciplinary Research in Theory and Practice comprises seven sections, each viewing musical creativity from a different scientific vantage point, from the

A Concise Survey of Music Philosophy helps music students choose a philosophy that will guide them throughout their careers. The book is divided into three sections: central issues that any music philosophy ought to consider (e.g., beauty, emotion, and aesthetics); secondly, significant philosophical positions, exploring what major thinkers have had to say on the subject; and finally, opportunities for students to consider the ramifications of these ideas for themselves. Throughout the book, students are encouraged to make choices that will inform a philosophy of music and music education with which they are most

comfortable to align. Frequently, music philosophy courses are taught in such a way that the teacher, as well as the textbook used, promotes a particular viewpoint. A Concise Survey of Music Philosophy presents the most current, prevalent philosophies for consideration. Students think through different issues and consider practical applications. There are numerous musical examples, each with links from the author's home website to online video performances. Examples are largely from the Western classical canon, but also jazz, popular, and world music styles. In the last two chapters, students apply their views to practical situations and learn the differences between philosophy and advocacy. "Hodges has written an excellent resource for those wanting a short—but meaningful—introduction to the major concepts in music philosophy. Applicable to a number of courses in the music curriculum, this much-needed book is both accessible and flexible, containing musical examples, tables and diagrams, and additional readings that make it particularly useful for a student's general introduction to the topic. I especially like the emphasis on the personal development of a philosophical position, which makes the material especially meaningful for the student of music." —Peter R. Webster, Scholar-in-Residence, Thornton School of Music, University of Southern California, USA

Direct and easily understood. -- New books, Jazz Educators Journal Bernard Brandt says: "Hearing and Writing Music", by Ron

Gorow, is a superb book. It makes a simple and elegant presentation of the internal process by which we hear sounds and music, how we recognize intervals, chords, melody, harmony, counterpoint, and the timbre of instrumentation/ orchestration, how we can develop the skills of listening, auditory memory and imagination, and how to use these skills to hear and to write down music of any sort. The hallmark of an expert is the ability to explain the basics of his field as simply as possible. By that standard, Mr. Gorow has proven his expertise in this book. I note that the other reviews, both for Amazon and in musical journals, tend to limit the importance of "Hearing and Writing Music" to ear training. I believe that Mr. Gorow's book is valuable for much more than ear training. I have studied it, and as a result of that study, I believe that my auditory memory and imagination and my abilities in score reading have improved enormously. Further, I have been able to use the skills in this book to transcribe melodies, harmonies and counterpoint almost effortlessly, both those that I have heard, and those which existed only in my imagination. This book has opened many doors for me. I believe that it can do so for many others. Discusses the geography, history, government, economy, people, and culture of the Philippines, an archipelago of many islands in the Western Pacific. International music studies.

Ethnomusicological fieldwork has significantly changed since the end of the the 20th century. Ethnomusicology is in a critical moment that requires new perspectives on fieldwork - perspectives that are not addressed in the standard guides to ethnomusicological or anthropological method. The focus in ethnomusicological writing and teaching has traditionally

centered around analyses and ethnographic representations of musical cultures, rather than on the personal world of understanding, experience, knowing, and doing fieldwork. *Shadows in the Field* deliberately shifts the focus of ethnomusicology and of ethnography in general from representation (text) to experience (fieldwork). The "new fieldwork" moves beyond mere data collection and has become a defining characteristic of ethnomusicology that engages the scholar in meaningful human contexts. In this new edition of *Shadows in the Field*, renowned ethnomusicologists explore the roles they themselves act out while performing fieldwork and pose significant questions for the field: What are the new directions in ethnomusicological fieldwork? Where does fieldwork of "the past" fit into these theories? And above all, what do we see when we acknowledge the shadows we cast in the field? The second edition of *Shadows in the Field* includes updates of all existing chapters, a new preface by Bruno Nettl, and seven new chapters addressing critical issues and concerns that have become increasingly relevant since the first edition.

This book is about the gender dimensions of natural resource exploitation and management, with a focus on Asia. It explores the uneasy negotiations between theory, policy and practice that are often evident within the realm of gender, environment and natural resource management, especially where gender is understood as a political, negotiated and contested element of social relationships. It offers a critical feminist perspective on gender relations and natural resource management in the context of contemporary policy concerns: decentralized governance, the elimination of poverty and the mainstreaming of gender. Through a combination of strong conceptual argument and empirical material from a variety of political economic and ecological contexts (including Cambodia, China, Indonesia, Malaysia, Nepal,

Thailand and Vietnam), the book examines gender-environment linkages within shifting configurations of resource access and control. The book will serve as a core resource for students of gender studies and natural resource management, and as supplementary reading for a wide range of disciplines including geography, environmental studies, sociology and development. It also provides a stimulating collection of ideas for professionals looking to incorporate gender issues within their practice in sustainable development. Published with IDRC."

Why are some popular musical forms and performers universally reviled by critics and ignored by scholars-despite enjoying large-scale popularity? How has the notion of what makes "good" or "bad" music changed over the years-and what does this tell us about the writers who have assigned these tags to different musical genres? Many composers that are today part of the classical "canon" were greeted initially by bad reviews. Similarly, jazz, country, and pop musics were all once rejected as "bad" by the academy that now has courses on these and many other types of music. This book addresses why this is so through a series of essays on different musical forms and performers. It looks at alternate ways of judging musical performance beyond the critical/academic nexus, and suggests new paths to follow in understanding what makes some music "popular" even if it is judged to be "bad." For anyone who has ever secretly enjoyed ABBA, Kenny G, or disco, Bad Music will be a guilty pleasure! From the chief architect of the Pandora Radio's Music Genome Project comes a

definitive and groundbreaking examination of how your mind, body, and upbringing influence the music you love. Everyone loves music. But what is it that makes music so universally beloved and have such a powerful effect on us? In this sweeping and authoritative book, Dr. Nolan Gasser—a composer, pianist, and musicologist, and the chief architect of the Music Genome Project, which powers Pandora Radio—breaks down what musical taste is, where it comes from, and what our favorite songs say about us. Dr. Gasser delves into the science, psychology, and sociology that explains why humans love music so much; how our brains process music; and why you may love Queen but your best friend loves Kiss. He sheds light on why babies can clap along to rhythmic patterns and reveals the reason behind why different cultures around the globe identify the same kinds of music as happy, sad, or scary. Using easy-to-follow notated musical scores, Dr. Gasser teaches music fans how to become engaged listeners and provides them with the tools to enhance their musical preferences. He takes readers under the hood of their favorite genres—pop, rock, jazz, hip hop, electronica, world music, and classical—and covers songs from Taylor Swift to Led Zeppelin to Kendrick Lamar to Bill Evans to Beethoven, and through their work, Dr. Gasser introduces the musical concepts behind why you hum along, tap your foot, and feel deeply. *Why You Like It* will teach you how to follow the musical discourse happening within a song and thereby empower your musical taste, so you will never hear music the same way again.
