This book contains papers presented at the 11th Symposium of Computer Aided Process Engineering (ESCAPE-11), held in Kolding, Denmark, from May 27-30, 2001. The objective of ESCAPE-11 is to highlight the use of computers and information technology tools, that is, the traditional CAPE topics as well as the new CAPE topics of current and future interests. The main theme for ESCAPE-11 is process and tools integration with emphasis on hybrid processing, cleaner and efficient technologies (process integration), computer aided systems for modelling, design, synthesis, control (tools integration) and industrial case studies (application of integrated strategies). The papers are arranged in terms of the following themes: computer aided control/operations, computer aided manufacturing, process and tools integration, and new frontiers in CAPE. A total of 188 papers, consisting of 5 keynote and 183 contributed papers are included in this book.

Now in its third edition, this trusted clinical guide enables both the busy practitioner and student to review or to learn about a range of pathologies, conditions, examinations, diagnostic procedures, and interventions that can be effectively used in the physical rehabilitation of older people. It presents a broad overview of age-related physiological changes as well as specific professional discipline perspectives. Organized into eleven distinct and interrelated units, the first unit begins with key anatomical and physiological considerations seen with aging which have significant impact on the older person. The second and third units go on to review important aging-related conditions and disorders of the musculoskeletal and neuromuscular/neurological systems respectively. Neoplasms commonly encountered in older people are the focus of the fourth unit; while aging-related conditions of the cardiovascular, pulmonary, integumentary and sensory systems are presented in units five through seven. Unit eight highlights a range of specific clinical problems and conditions commonly encountered with older patients. Critically, all of these units emphasize important examination and diagnostic procedures needed for a thorough evaluation and stress interventions that can be of significant benefit to the older patient. The ninth unit presents select physical therapeutic interventions that are especially important in managing rehabilitative care. Key societal issues related to aging are discussed in the tenth unit. Finally, the concluding eleventh unit focuses on the successful rehabilitation team that includes both professional and non-professional caregiver members. A trusted guide to the conditions and problems faced when evaluating and treating geriatric patients Extensive coverage over 84 chapters, each written by an expert in the field Includes imaging, vision and the aging ear Cross-referenced - providing the complexity and inter-relatedness of co-morbidities common to aging patients Collaborative international perspective Chapters on the aging spine; frailty; safe pilates for bone health; health care for older people Additional renowned editor - Ronald W. Scott Revised title to reflect the comprehensive scope of content covered (previously entitled Geriatric Rehabilitation Manual) Provides detailed data on the financial structure and the operations of United States affiliates of foreign companies. Includes information on: balance sheets; income statements; sales of goods and services; external financial position; employment and employee compensation; United States merchandise trade; research and development expenditures; United States lands owned or leased; foreign direct investment in the United States; and balance of payments transactions between United States affiliates and their foreign parent companies

This book contributes to the growth of interest in Content and Language Integrated Learning (CLIL), an approach to second/foreign language learning that requires the use of the target language to learn content. Within the framework of European strategies to promote multilingualism, CLIL has begun to be used extensively in a variety of language learning contexts, and at different educational systems and language programmes. This book brings together critical analyses on theoretical and implementation issues of Content and Language Integrated Learning, and empirical studies on the effectiveness of this type of instruction on learners' language competence. The basic theoretical assumption behind this book is that through successful use of the language to learn content, learners will develop their language proficiency more effectively while they learn the academic content specified in the curricula.

Mit Computervalidierung weist man nach, daß Software und Hardware das tun, was sie tun sollen. Dieser Nachweis ist nicht nur eine Forderung von Qualitätssicherungssystemen wie GCP (Good Clinical Practice), GLP (Good Laboratory Practice) oder GMP (Good Manufacturing Practice). Auch die Zertifizierung (ISO 9000), Akkreditierung (EN 45000) und die Qualitätssicherung im Lebensmittelbereich (HACCP) erfordern entsprechende Maßnahmen. Mit diesem Buch liegt erstmals ein umfassendes Werk zu diesem Thema in deutscher Sprache vor. Jeder, der sich mit dieser Problemstellung konfrontiert sieht, erhält verständliche Anleitungen zur praktischen Umsetzung. Im Buch wird gezeigt, wie eine Validierungsorganisation zweckmäßig und wirtschaftlich aufgebaut und dokumentiert werden kann. Davon profitieren Betriebsleiter in der Herstellung von Pharmaka, Chemikalien, Pflanzenschutzmittel, Kosmetika oder Lebensmittel ebenso wie Laborleiter in Forschungs- und Entwicklungsabteilungen, Analytik und Qualitätskontrolle.
