We Americans may reside in the greatest nation on earth, but our lifestyle is killing us. One-quarter of us still smoke, two-thirds of us are fat, three-quarters of us don't exercise, and stress and depression are ubiquitous. We wolf down oversized portions of fast food in minutes and boast of not having taken a vacation in years. We get misinformation like "olive oil is healthy" but then get fatter because drizzling three tablespoons of oil on a salad adds as many calories as two scoops of premium ice cream. Despite all our advances in drugs and surgery, obesity and the diseases it causes have shortened life expectancy; this is the first time in

In life, have we ever been catapulted to a comfortable stratosphere? And suddenly, one day, we can't believe we've been dropped in the middle of nowhere. That is what happened in the complex lives of the two main characters, Pastor David Wyan and his wife, Debora Wyan. The unimaginable lurked around every corner, waiting to trip them up and totally destroy them. Incredible demands were forced in their lives. How did they manage to stay sane in their little Christian community? Buried beneath these pages, there is an army of hidden, dark secrets. Some of them leave our thoughts and imaginations at the edge of steep, rocky cliffs. And other secrets drive us to a place of stolen identity. Nevertheless, whenever we love something, we fight incredibly hard to take back our control and what is rightfully ours. This story is provocative, alluring, riveting, heart-wrenching, and enthralling.

Sense and Sensitivity advances a novel research proposal in the nascent field of formal pragmatics, exploring in detail the semantics and pragmatics of focus in natural language discourse. The authors develop a new account of focus sensitivity, and show that what has hitherto been regarded as a uniform phenomenon in fact results from three different mechanisms. The book Makes a major contribution to ongoing research in the area of focus sensitivity – a field exploring interactions between sound and meaning, specifically the dependency some words have on the effects of focus, such as "she only LIKES me" (i.e. nothing deeper) compared to "she only likes ME" (i.e. nobody else) Discusses the features of the QFC theory (Quasi association, Free association, and Conventional association), a new account of focus implying a tripartite typology of focus-sensitive expressions Presents novel cross-linguistic data on focus and focus sensitivity that will be relevant across a range of linguistic sub-fields: semantics and

pragmatics, syntax, and intonational phonology Concludes with a case study of exclusives (like “only”), arguing that the entire existing literature has missed crucial generalizations, and for the first time explaining the focus sensitivity of these expressions in terms of their meaning and discourse function
