Presents the boyhood of the brothers who flew the first airplane in 1903.

As young boys, Orville and Wilbur Wright loved all things mechanical. As young men, they gained invaluable skills essential for their success by working with printing presses, bicycles, motors, and any sort of machinery they could get their hands on. As adults, the brothers worked together to invent, build, and fly the world's first successful airplane. This is the fascinating story of the two inventors and aviation pioneers who never lost sight of their dream: to fly, and to soar higher!

Meet the people who helped shape the world we know today. 100 People Who Made History is no ordinary history book. Inventors and explorers rub shoulders with political leaders, sports stars, and entertainers. From Marco Polo to Marie Curie via Pele, this top 100 comes from all over the world, taking in all types of people. Packed with engaging graphics and plenty of unusual facts, each profile describes the major influences and tells true stories about the movers and shakers from our history. Take a seat and meet the people that have changed our world and discover how they did it. In this book, author Rosalie Schwartz uses the 1933 RKORadio Pictures production Flying Down to Rio to examine the interplay of technology and popular culture that shaped a distinctive twentiethcentury sensibility. The musical comedy connected

airplanes, movies, and tourism, ending spectacularly with chorus girls dancing on the wings of airplanes high above Rio de Janeiro, Brazil. The Hollywood fantasy capped three decades during which airplanes and movies engendered new expectations and redefined peoples sense of wellbeing, their personal satisfactions, and their interpersonal relations. Wilbur and Orville Wright flew their airplane in 1903, at the same time that filmmakers began to project edited, filmed stories onto large screens. Spectators found entertainment value in both airplane competitions and motion pictures, and movie producers brought the thrill of aviators antics to a rapidly expanding audience. Meanwhile, air shows and competitions attracted large crowds of tourists. Mass tourism grew as a leisuretime activity, stimulated in part by travelogues and feature films. By 1930, the businessmen who envisioned transporting tourists to their destinations by airplane struggled to overcome the movieexaggerated association of flight with danger. Schwartz weaves these threads into a story of human daring and persistence, political intrigue, and international competition. From Wilbur and Orville to Fred and Ginger, Schwartzs narrative follows the fortunes of aviation and movie pioneers and the foundations and growth of Pan American Airways and RKORadio Pictures, the two companies that came together in Flying Down to Rio. By the end of the twentieth century, aviation, movies, and mass tourism had become powerful global industries, contributing to an internationally connected, entertainmentoriented culture. What was once unthinkable had now become expected.

Inspired by a model helicopter and encouraged by their parents and sister, young Orville and Wilbur Wright attempt to build a life-size helicopter from scrap.

James Tobin, award-winning author of Ernie Pyle's War and The Man He Became, has penned the definitive account of the inspiring and impassioned race between the Wright brothers and their primary rival Samuel Langley across ten years and two continents to conquer the air. For years, Wilbur Wright and his younger brother, Orville, experimented in obscurity, supported only by their exceptional family. Meanwhile, the world watched as Samuel Langley, armed with a contract from the US War Department and all the resources of the Smithsonian Institution, sought to create the first manned flying machine. But while Langley saw flight as a problem of power, the Wrights saw a problem of balance. Thus their machines took two very different paths—Langley's toward oblivion, the Wrights' toward the heavens—though not before facing countless other obstacles. With a historian's accuracy and a novelist's eye, Tobin has captured an extraordinary moment in history. To Conquer the Air is itself a heroic achievement.

Is your child getting lost in the system, becoming bored, losing his or her natural eagerness to learn? If so, it may be time to take charge of your child's education—by doing it yourself. *The Well-Trained Mind* will instruct you, step by step, on how to give your child an academically rigorous, comprehensive education from preschool through high school—one that will train him or her to read, to think, to understand, to be well-rounded and curious about learning. Veteran home educators Susan Wise Bauer and Jessie Wise outline the classical pattern of education called the trivium, which organizes learning around the maturing capacity of the child's mind and comprises three stages: the elementary school "grammar stage," when the building blocks of information are absorbed through memorization and rules; the middle school "logic stage," in which the student begins to think more analytically; and the high-school "rhetoric stage," where the student learns to write and speak with force and originality. Using this theory as your model, you'll be able to instruct your child—whether full-time or as a supplement to classroom education—in all levels of reading, writing, history, geography, mathematics, science, foreign languages, rhetoric, logic, art, and music, regardless of your own aptitude in those subjects. Thousands of parents and teachers have already used the detailed book lists and methods described in *The Well-Trained Mind* to create a truly superior education for the

'Met hen begon een nieuw tijdperk. McCullough prikkelt met deze dubbelbiografie de verbeelding.' James Salter in The New York Review of Books  
Op een winterdag in 1903, in de afgelegen Outer Banks van North Carolina, schreven twee onbekende broers uit Ohio geschiedenis. Ze vlogen in een machine die zwaarder was dan de lucht, werd aangedreven door een motor en

bestuurd door een piloot. Het was het begin van het tijdperk van de luchtvaart. David McCullough, tweevoudig winnaar van de Pulitzerprijs, vertelt het verrassende en ontroerende verhaal van Wilbur en Orville Wright. De gebroeders Wright openden in 1893 in Dayton, Ohio, een fietsenwinkel met werkplaats. De fiets was dé nieuwe rage. Hun eerste gezamenlijke onderneming was het bouwen van een eigen fiets, maar hun grote passie was vliegen. 'Een mens vliegt niet en zal ook nooit vliegen' was de overtuiging in 1900. De broers dachten daar anders over. Ze lazen alles wat er te lezen was over vliegen, bestudeerden de vleugelbewegingen van vogels en zetten in de fietsenwerkplaats hun eerste vliegtuig in elkaar. Vertrouwend op hun unieke talenten en technisch inzicht hielden zij vast aan hun droom 'de lucht in te gaan'. Met buitengewoon veel moed, inventiviteit, doorzettingsvermogen en een onuitputtelijke nieuwsgierigheid overwonnen ze alle obstakels. Niets kon ze van hun doel afhouden. David McCullough baseerde zich onder meer op dagboeken, aantekeningen en meer dan duizend brieven van de familie Wright. De gebroeders Wright is een spannend avontuur, verteld door de meesterverteller van de Verenigde Staten, dat tegelijkertijd een prachtig tijdsbeeld geeft van het begin van de 20e eeuw. 'Het fascinerende verhaal achter de geboorte van de luchtvaart. De gebroeders Wright waren zowel bevlogen als bescheiden en die

Ever since the dawn of civilization, humans have been fascinated by flight. While mankind could match and conquer almost every kind of creature in nature, aerial motion was an ability that remained out of its grasp. After centuries of trial and errors, it was finally in 1903 that the human intellect made the first step to conquer the skies. And this step was taken by the Wilbur and Orville Wright of USA. Apart from the first fully operational airplane, the Wright brothers invented or improved upon many other machines like the bicycle and glider. Their technological mastery and aerial engineering ushered in a new chapter in human locomotion and transportation.

Orville and Wilbur Wright, two bicycle-making brothers from Dayton, Ohio, secured their place as the most famous names in aviation history when, on December 17, 1903, they made the first powered, controlled, and sustained heavier-than-air flight. But their success over the cold and windswept Carolina dunes that day has overshadowed their many other accomplishments before and after that historic flight. The Wrights' progression from theory to analysis to ground-testing components and wing shapes, and then to flight-testing kites,

gliders, and their first powered aeroplane, marked the world's first successful 'X-Plane' research and development programme. They established a template all subsequent aircraft have followed, one still relevant in the era of hypersonic flight and drone research. This book traces the Wright Brothers' story, from their first success on that cold December day throughout their glory years to their eventual eclipse by other aviators. It explores in detail the process that led them to their pioneering craft and their many subsequent achievements over the following years, and highlights their enduring importance in the age of modern flight.

In Robert Burleigh's nonfiction picture book *Wilbur Wright Meets Lady Liberty*, illustrated by Wendell Minor, two American icons meet during Wilbur Wright's dramatic flight circling the Statue of Liberty. On September 29th, 1909, Wilbur Wright performed his first public flight for a crowd of disbelievers in the New York Harbor, home to the Statue of Liberty. With courage and caution, he put his airplane to the test and flew around the iconic landmark while the crowd observed, breathless. This minute-by-minute account of Wright's voyage over New York City captures the weight and the wonder of human achievement. When Wilbur Wright met Lady Liberty, he propelled his dream into the imaginations of many, securing the future of aviation. Christy Ottaviano Books

the Wright brothers' first flight. Brilliant, self-trained engineers, the Wright brothers had a unique blend of native talent, character, and family experience that perfectly suited them to the task of invention but left them ill-prepared to face a world of skeptics, rivals, and officials. Using a treasure trove of Wright family correspondence and diaries, Tom Crouch skillfully weaves the story of the airplane's invention into the drama of a unique and unforgettable family. He shows us exactly how and why these two obscure bachelors from Dayton, Ohio, were able to succeed where so many better-trained, better-financed rivals had failed.

The book "Top 5 Inventors of the World" starts with the legendary mathematician of ancient Greece and ends with Internet icons of the present age. In between it attempts to take stock of the major inventors - based on a chronological order - whose ideas and designs played a defining role in the shaping of present human society.

For the first time, nearly seventy of Wilbur and Orville Wright's published writings are brought together in a single, annotated reference. Spanning the decades from the brothers' turn-of-the-century experiments with gliders until Orville's death in 1948, the articles describe the design of their aircraft, early test flights, and camp life at Kitty Hawk. Because Wilbur's sudden death in 1912 ended any hope that the Wrights would produce a book of their own, the articles collected in this volume are their only published words.

A biography of the aviator brothers, for beginning readers.
