The chaotic events leading up to Mitt Romney's defeat in the 2012 election indicated how far the Republican Party had rocketed rightward away from the center of public opinion. Republicans in Congress threatened to shut down the government and force a U.S. debt default. Tea Party activists mounted primary challenges against Republican officeholders who appeared to exhibit too much pragmatism or independence. Moderation and compromise were dirty words in the Republican presidential debates. The GOP, it seemed, had suddenly become a party of ideological purity. Except this development is not new at all. In Rule and Ruin, Geoffrey Kabaservice reveals that the moderate Republicans' downfall began not with the rise of the Tea Party but about the time of President Dwight Eisenhower's farewell address. Even in the 1960s, when left-wing radicalism and right-wing backlash commanded headlines, Republican moderates and progressives formed a powerful movement, supporting pro-civil rights politicians like Nelson Rockefeller and William Scranton, battling big-government liberals and conservative extremists alike. But the Republican civil war ended with the overthrow of the moderate ideas, heroes, and causes that had comprised the core of the GOP since its formation. In hindsight, it is today's conservatives who are "Republicans in Name Only." Writing with passionate sympathy for a bygone tradition of moderation, Kabaservice recaptures a time when fiscal restraint was matched with social engagement; when a cohort of leading Republicans opposed the Vietnam war; when George Romney--father of Mitt Romney--conducted a nationwide tour of American poverty, from Appalachia to Watts, calling on society to "listen to the voices from the ghetto." Rule and Ruin is an epic, deeply researched history that reorients our understanding of our political past and present. Today, following the Republicans' loss of the popular vote in five of the last six presidential contests, moderates remain marginalized in the GOP and progressives are all but nonexistent. In this insightful and elegantly argued book, Kabaservice contends that their decline has left Republicans less capable of governing responsibly, with dire consequences for all Americans. He has added a new afterword that considers the fallout from the 2012 elections.

Leer om niet langer je eigen vijand te zijn en iedere minuut voluit te leven! Veel mensen kennen het gevoel tekort te schieten maar al te goed. Er is niet veel voor nodig horen hoe goed iemand anders is, zelf bekritiseerd worden, een woordenwisseling, een fout op het werk om te denken dat we niet goed genoeg zijn. Dit kan leiden tot zelfveroordeling, relatieproblemen, perfectionisme, eenzaamheid en overwerk. Zelfaanvaarding is een proces dat een leven lang duurt. In Het leven liefhebben door acceptatie beschrijft Tara Brach op een open en eerlijke manier hoe zij haar weg heeft gevonden. Via haar persoonlijke verhaal en dat van haar cliënten en leerlingen, geleide meditaties, gedichten en citaten weet zij tot de kern van het probleem door te dringen. Want pas als je begrijpt hoe het gevoel van onwaardigheid is ontstaan, kun je verbinding maken met je echte ik en jezelf leren vertrouwen en omarmen. Tara Brach is psychotherapeut en toonaangevend lerares op het gebied van mindfulness, emotionele genezing en spiritueel ontwaken. Zij is oprichter van de Insight Meditation Community en geeft zeer drukbezochte workshops in binnen- en buitenland. www.tarabrach.com

This volume enables readers to understand the complexity associated with climate change policy and the science behind it. For example, the author describes the criticism and defense of the widely known "hockey stick" temperature graph derived from combining instrumental data and proxy temperature indications using tree ring, ice core and other paleoclimatic data. Readers will also learn that global warming cannot easily be avoided by reducing CO_2 and other greenhouse gas emissions in rich countries. Not only is emissions reduction extremely difficult in rich countries, but demands such as the UN mandate to improve the lives of the poorest global citizens cannot be satisfied without significantly increasing global energy use, and CO_2 emissions. Therefore, the author asserts that climate engineering and adaptation are preferable to mitigation, particularly since the science is less than adequate for making firm statements about the Earth's future climate. `An excellent compilation..... Given the explosion in the demand for both counselling and supervision, this book should be required reading for all those putting a toe in these complex waters. However, I think it is also a salutary guide for those already practising as trainers and supervisors. I found the issues raised stimulated me to think again about my own practice and to profit from that exercise' - Counselling, The Journal of The British Association for Counselling & Psychotherapy This accessible book explores the issues involved in both the training and supervision of counsellors and in the preparation of those who are to undertake supervisory and training roles. The number of training courses is growing and counsellors must undergo supervision if they are to be accredited by professional bodies. In this volume, leading trainers and supervisors from different counselling traditions discuss the responsibilities and the professional and practical issues involved, and a trainee and supervisee give an insider's view of what it feels like to be in these positions. The closing chapter deals with the important issue of training for counsellor trainers and supervisors.
